

Advanced Laparoscopic Bariatric Surgery Now Available in Karnal by Ckosmic Health City

Karnal, Haryana Jul 31, 2025 ([Issuewire.com](https://www.issuewire.com)) - Ckosmic Health City is proud to announce an ultimate advancement in weight-loss surgery with the introduction of advanced laparoscopic bariatric surgery in Karnal, led by the renowned Dr. Amit Sood. As a leading healthcare destination, Ckosmic Health City is committed to bringing cutting-edge medical solutions to the community, ensuring world-class care is accessible close to home.

In a significant stride towards combating obesity and related metabolic disorders, Dr. Amit Sood now brings Advanced Laparoscopic Bariatric Surgery to Karnal. With obesity rates rising rapidly in India, there is an urgent need for safe, effective, and minimally invasive weight-loss solutions. Traditional open surgeries often come with longer recovery times and higher risks, making laparoscopic bariatric surgery the preferred choice for patients seeking faster healing and better outcomes. Dr. Sood's expertise ensures that residents of Karnal and surrounding regions no longer need to travel to metro cities for world-class bariatric care.

The demand for advanced laparoscopic bariatric procedures, such as sleeve gastrectomy, gastric bypass, and mini-gastric bypass, has surged due to their precision, minimal scarring, and high success rates. These procedures not only aid in significant weight loss but also help manage diabetes, hypertension, and other obesity-related conditions. With cutting-edge technology and a patient-centric approach, Dr. Amit Sood is set to transform lives by offering affordable, and *advanced laparoscopic best bariatric surgery in Karnal*. This initiative marks a new era in healthcare accessibility, empowering individuals to achieve healthier, more active lifestyles with confidence.

Combating Obesity Epidemic: The Surging Need for Advanced Weight Loss Surgery

The global obesity epidemic continues to escalate, with over 650 million adults classified as obese worldwide, according to the World Health Organization (WHO). As traditional weight loss methods like

diet and exercise often fall short for individuals with severe obesity, the demand for advanced weight loss surgeries, such as gastric bypass, sleeve gastrectomy, and gastric balloons, has surged. These procedures offer not only significant weight reduction but also improvements in obesity-related conditions like type 2 diabetes, hypertension, and sleep apnea. The global bariatric surgery market, valued at \$2.9 billion in 2023, is projected to grow at a CAGR of 7.5%, reflecting the increasing reliance on surgical interventions to combat this health crisis.

"Advanced weight loss surgery is no longer just about losing weight—it's about reclaiming lives and preventing life-threatening diseases," said by a leading bariatric surgeon. In the U.S. alone, over 250,000 bariatric surgeries are performed annually, a number expected to rise as metabolic disorders become more prevalent. As healthcare systems prioritize long-term solutions, advanced weight loss surgeries stand at the forefront of combating this epidemic, offering hope to millions struggling with obesity.

State-of-the-Art Laparoscopic Bariatric Surgery Now in Karnal – Precision, Safety, Faster Recovery!
