

Aeron Systems Announces New Advanced Manufacturing Facility to Power Global Expansion

Aeron Systems Expands Globally with New High-Tech Manufacturing Hub

JULY 2025

Pune, Maharashtra Jul 18, 2025 ([IssueWire.com](https://www.issuewire.com)) - Aeron Systems, India's leading developer of cutting-edge [inertial navigation](#) and environmental sensing technologies, proudly announces the launch of a new 20,000 sq. ft. advanced manufacturing facility—a strategic leap in its mission to scale globally across aerospace, defense, and [renewable energy sectors](#).

Set to become fully operational by October 2025, the facility will be AS9100D-certified, ensuring compliance with the highest international standards in aerospace manufacturing. It will also feature ISO Class 6 and ISO Class 8 clean rooms, enabling ultra-precise assembly and testing for mission-critical systems.

Key Capabilities of the New Facility

- Fully Automated Electronic Assembly Lines
- Automated Calibration and Testing Systems
- Environmental Stress Screening Infrastructure
- Controlled Cleanroom Environments for High-Reliability Manufacturing

“The next chapter of Aeron’s journey will be written here,” said **Mr Abhijeet Bokil, Managing Director, Aeron Systems**. “This facility represents our unwavering commitment to precision, reliability, and excellence in engineering.”

Adding to this, **Mr Ashvani Shukla, CEO of Aeron Systems**, said:

“With this new facility, Aeron is not just increasing capacity—we’re building capability. It embodies our vision of making India a global hub for high-performance electronics and navigation systems. This is the infrastructure that will power the next decade of innovation at Aeron.”

This expansion is a key enabler in Aeron’s long-term strategy to serve global OEMs, system integrators, and governments with cutting-edge, export-ready technology platforms. The facility marks a major milestone in Aeron’s pursuit of engineering leadership and manufacturing excellence on the world stage.
