

AI FILMS Unveils Browser Based “AI FILMS STUDIO” — Free Editor, Creator Credits & Referral-Powered Funding

New browser studio lets AI creators make AI driven films, shorts, ads, clips,... and earn up to \$2 in credits per referral, and upgrade to unlock advanced AI tools.

Los Angeles, California Jul 29, 2025 ([Issuewire.com](https://www.issuewire.com)) - **AI FILMS** has released **AI FILMS STUDIO**, a browser based platform that lets anyone draft, edit and ship AI films, clips, shorts from minutes to hours. More than **3,700+ creators** have already joined the AI FILMS ecosystem, and early projects promoted by the company have led to paid gigs. One filmmaker was hired by the Indian

Government after his short went viral.

WHY CREATORS ARE FLOCKING

- **Free to start, no watermark.** Register and access the full timeline editor at zero cost; import your own assets or upgrade to generate with built-in AI tools.
- **Referral-funded creativity.** New subscribers who enter a creator's **username/brand** save **up to US \$4** on the monthly subscription (plan dependent); the creator earns recurring studio credits (up to **US \$2 per referral**) that stack monthly and expire only after 90 days of inactivity.
- **Fair pricing, clear math.** Plans run **US \$11–64** per month, with a discount if mentioning another creator enrolled in the online studio.
- **4.9/5 user rating** (internal survey, July 2025). Creators praise the fast turnaround and exposure via **AI FILMS** social channels.
- **Ever growing toolbox.** New AI modules: audio dubbing, lipsync, "Veo 3" video generation and more. Roll out continually. And a standalone **AI FILMS Streaming Platform** is next.

*"Filmmaking shouldn't be gated by budget or hardware," said **Cesar**, founder & CEO of AI FILMS. "We built a studio that lives in the browser, funds its own creators, and grows stronger every time one filmmaker helps another."*

HOW IT WORKS

- Sign up free at studio.aifilms.ai
- Create with the timeline editor (no watermark) or unlock higher tier AI generation with a paid plan.
- Share your film or enable the feature to be promoted (free); viewers who join with your **username/brand** feed credits right back to you.
