

Alwayne Love Delves Deep with New Single "Nobody But Love"

An eclectic blend of acoustic sounds, soft Rock, and Soul, infused with elements of Reggae.

New York City, New York Jul 24, 2025 ([Issuewire.com](https://www.issuewire.com)) - Emerging recording artist Alwayne Love, in collaboration with his management team at T25 Records, has recently unveiled a poignant new single titled "Nobody but Love." This powerful tune draws inspiration from the myriad challenges he currently faces, particularly his efforts to maintain a balanced life as a family man while simultaneously advancing his career as a singer and songwriter.

Musically, "Nobody but Love" is an eclectic blend of acoustic sounds, soft rock, and soul, infused with elements of reggae. Lyrically, Alwayne embarks on an endearing journey for the listener, emphasizing that nothing holds greater significance than love—specifically the love from God itself. In discussing the inspiration behind this track, Alwayne stated: "The concept of this song represents a milestone in my journey and its relevance to current events; choosing morals over profanity and venturing into unknown territories necessitating faith oversight can lead to isolation where one must rely solely on God."

The beat for "Nobody but Love" was crafted by Ryini Beats, a Los Angeles-based company led by Ryan Anderson—a notable musician, composer, songwriter, and producer. When reflecting on what he hopes listeners will take away from this song, Alwayne remarked: "Listeners should acknowledge that when push comes to shove those you love may not always be present for you. Even amidst friends and family who are often preoccupied with their own distractions—especially as men are expected to embody strength—they may overlook your emotional struggles. Ultimately, only God remains steadfast when it matters most since one's worth is inherently tied to what they have to offer." "Nobody but Love" is now available across all major streaming platforms including Apple Music, Spotify, Deezer, Tidal, Amazon Music, iTunes, Pandora among others. An official music video has already been filmed and will be released soon.
