

ApoloSign Introduces 32inch Smart Portable TV with MultiRoom Mobility

Battery Powered Touch Screen Supports Android OS for Flexible Home Integration

Los Angeles, California Jul 4, 2025 ([Issuewire.com](https://www.apolosign.com/products/apolosign-32-inch-portable-smart-screen?utm_campaign=726557&utm_source=shareable_link)) - ApoloSign today launched its 32-inch Smart Portable TV (https://www.apolosign.com/products/apolosign-32-inch-portable-smart-screen?utm_campaign=726557&utm_source=shareable_link), a battery powered touch screen device designed for dynamic placement in residential environments. The product features a 4K UHD panel with 100% sRGB coverage and integrates wheeled mobility for movement between rooms.

Technical Capabilities

Untethered Operation: Integrated 6hour battery enables cord free use in kitchens, bathrooms, or outdoor spaces

Android OS Integration: Supports streaming platforms (Netflix, YouTube, Disney+) and third party applications

Supports wireless and wired screen mirroring, including Android/iOS/Mac/Windows.

Design Philosophy

“Traditional displays confine content to fixed locations,” said Fyhack, Chief Product Officer at ApoloSign. “By combining mobility with touch interaction, we enable screens to adapt to human behavior rather than the reverse.”

Target Applications

The device addresses multiple usage scenarios:

Videoguided cooking tutorials in kitchens

Fitness training with large screen demonstrations

Interactive educational content for children

Centralized control of smart home devices

Product Availability

Available in two configurations:

1080P Base Model

4K Pro Model with extended battery
