

Beyond Key Expands Data Capabilities with Launch of Databricks Consulting Services

Chicago, Illinois Jul 25, 2025 ([Issuewire.com](https://www.issuewire.com)) - Beyond Key has formally introduced its [Databricks consulting services](#), offering organizations a thoughtful path to unified analytics in a world where data continues to shape progress. This addition to Beyond Key's services reflects a steady shift in how enterprises are preparing for the next phase of data-driven growth.

Opening New Possibilities for Analytics

Businesses today are looking for ways to bring together information, act on insights quickly, and create more value with each decision. Piyush Goel, CEO at Beyond Key says, "Unified analytics has moved to the forefront as organizations recognize the advantages of working from a single, reliable platform. Databricks stands out as a flexible foundation, supporting collaboration, real-time access, and innovation across teams."

"The growing market for unified analytics comes as leaders seek solutions that can keep up with both the pace and the complexity of change. Organizations are making careful, forward-looking investments in platforms that encourage clear thinking and informed action," he adds.

Details of the Databricks Consulting Service

Beyond Key's Databricks consulting service is structured to give organizations the guidance they need, from initial planning through continued support. Every step is designed to align with actual business priorities, not just technical requirements.

- **Strategic Assessment:** Each project opens with a review of current data systems and clear goal-setting, ensuring that progress is steady and well-directed.
- **Architecture and Migration:** Solutions are created with attention to both present and future needs, making transitions to Databricks smooth and reliable.
- **Data Engineering:** Automated pipelines are built to prepare data efficiently, keeping it ready for analysis and decision-making.
- **Real-Time [Analytics](#):** [Dashboards and reports](#) are put in place to allow for ongoing monitoring and timely responses to new developments.
- **Machine Learning and AI:** Support is provided for organizations wanting to develop and deploy analytics models in practical, sustainable ways.
- **Cloud Integration:** Compatibility with major cloud platforms such as AWS, Azure, and Google Cloud ensures that each solution fits naturally into existing environments.
- **Cost Management:** Regular reviews help organizations use their resources with care and flexibility.
- **Ongoing Support:** Dedicated training and assistance are included, supporting teams as their

needs or ambitions grow.

Experience and Perspective

Drawing on two decades of work across more than 500 client engagements, Beyond Key's consulting team brings a steady, well-informed approach to each project. Certified Databricks specialists guide organizations through each phase, sharing insights and best practices at a pace that respects both urgency and care.

Sangeet Chorey, Principal Databricks Expert at Beyond Key, notes, "Progress in analytics isn't about speed alone. It is about building systems and skills that stand up over time. Our team's role is to provide guidance and support, always with the client's long-term vision in mind."

Industry Applications and Value

Ramen Chetia, Data Science Architect at Beyond Key mentions that, "Organizations in healthcare, finance, retail, and manufacturing are already using unified analytics to open new opportunities. What we have seen in healthcare is that, integrated data makes it easier to support patient care and planning. And financial firms are able to respond to risks and compliance needs with more confidence. Plus, retailers and manufacturers can rely on clearer data to guide operations and supply chain decisions."

Outcomes That Stand Out

Early feedback from clients shows that unified analytics brings measurable improvements. Teams report faster access to insights, more reliable reporting, and greater efficiency in day-to-day work. Many see reporting cycles shortened from weeks to hours, with analytics teams able to focus more on discovery and less on routine processing.

Organizations have also found that consolidating analytics tools leads to more predictable costs and smoother operations. These results support both immediate needs and the ability to adapt in the future.

A Partnership Approach

Beyond Key's consulting services emphasizes partnership and learning. Training and documentation are provided with every engagement, helping client teams build new skills and maintain momentum. The company's long-standing relationships with leading cloud providers help ensure each solution fits comfortably into broader IT strategies.

Looking Forward

Mr. Chorey adds, "The start of the Databricks consulting service marks an important step for organizations looking to simplify analytics and build lasting value from data." [Beyond Key](#) is committed to supporting enterprise clients as they move forward—helping them make sense of change, adopt new capabilities with confidence, and build strong data foundations for the years ahead.
