

Bioflare Renewable Energy Private Limited Leads India's Green Revolution with CNG, CBG, and EV Infrastructure!

From biofuels to electric mobility, Bioflare is laying the foundation for a low-carbon, sustainable India.

Noida, Uttar Pradesh Jul 16, 2025 ([Issuewire.com](https://www.issuewire.com)) - Bioflare Renewable Energy Private Limited is not just a company-it is a movement. A movement grounded in the belief that every single person in this world does have a role to play in making the world cleaner. Being sympathetic to CNG, CBG, EV charging systems, and solar energy solutions, Bioflare is paving its way towards sustainable development in alignment with national and international green goals.

The company areas support policies laid down under Atmanirbhar Bharat and under the Global Biofuels Alliance led by G20, showing the profound alignment of the aforesaid priorities of the Indian government and the global clean energy community.

While the world struggles with climate change and energy insecurity, India stands at a crossroads where sustainability is basically a given. Bioflare Renewable Energy Private Limited is all set to take the lead in any green transformation of processes of channeling energy generation and consumption in India. Shattering all paradigms with its green commitment, Bioflare is contributing to moving India towards

cleaner, smarter, and more sustainable fuel choices.

India's green energy revolution has placed Compressed Biogas (CBG) at the forefront of sustainable solutions. Initiatives like the SATAT scheme aim to transform waste into wealth while reducing emissions. However, despite its promise, CBG plants face significant hurdles in ensuring the offtake and sale of their gas, threatening the viability of this crucial sector.

Our Mission- Sustainability for All

Bioflare's vision is simple yet mighty: to offer every individual, in economical and sustainable ways, to choose clean energy. The company isn't happy just playing a part in the energy industry; it wants to change it. By making the adoption of clean energy easier and more financially sound, Bioflare is building the foundation for energy freedom and green empowerment, particularly in underrepresented and entrepreneurial communities.

This mission is more than a corporate declaration—it's a national call to action. Bioflare is directing its knowledge into real, tangible results that touch lives, livelihoods, and the soil we stand on.

Our Vision- A Leading Force in Renewable Energy

Bioflare sees a future where clean energy is the norm rather than the exception. The company wants to be among the leaders of the renewable energy sector, but pursues the path never for short-term gains but rather to forge real value for people, the economy, and the environment.

It is an opportunity-based and inclusive vision: Bioflare's not just putting up infrastructure—it supports local entrepreneurs, creates green-collar jobs, and allows communities to be active participants in the renewable energy-based economy.

What Bioflare Offers?

Bioflare provides a strong portfolio of renewable energy solutions that spans the complete project life cycle—from consultation to commissioning. Its services include:

CNG Retail Outlet Development

Approved by GA entities as approved by the Petroleum and Natural Gas Regulatory Board (PNGRB), Bioflare facilitates the establishment of effective, compliant CNG retail outlets in India.

CBG Plant Setup and Operation

Bioflare assists with installing and managing Compressed Bio-Gas plants, a prerequisite in the Indian biofuel scenario, to produce clean fuel from bio-waste.

EV Charging Infrastructure

With a view to soaring electric mobility, Bioflare provides the highest-quality EV charging station installation and integration to fill the void in the Indian EV evolution.

Solar and Renewable Energy Solutions

Bioflare provides customized solar energy solutions for residential, commercial, and industrial purposes—from residential rooftop solar to ground-mount.

End-To-End Project Consulting and Operations

From application filing all the way through to project commissioning, its services guarantee that a customer receives an all-round project experience free of aggravation and stress.

Why Bioflare Stands Out?

In a competitive renewable energy industry, Bioflare stands out for transparency, dependability, and outcomes. Here's why they're a go-to partner for green energy initiatives:

- Authorized GA Allotment Support with verified GA partners
- End-to-End Support for easy passage of regulatory and operational challenges
- No Hidden Charges, with a pledge of honest, transparent engagement
- Compliance-Focused Approach, strictly following safety and government guidelines
- Empowerment of Investors and Entrepreneurs, opening up business ventures in the green space

Not merely a service provider, Bioflare is a strategic partner, providing insights, expertise, and implementation that drive tangible results. If you're an entrepreneur looking to enter the renewable market or a community wanting sustainable energy solutions, Bioflare gives you the roadmap and assistance to reach your destination.

Investing in India's Future

Investing in Bioflare Renewable Energy Private Limited is not only about investing in infrastructure. It's about being part of something bigger:

- Lowering India's carbon footprint
- Driving rural growth through biofuel and solar initiatives
- Embracing employment opportunities in future industries
- Making India an even greater global clean energy leader

Each project Bioflare invests in creates momentum in India's green revolution. It puts policy into practice and ambition into action.

Be part of the Movement

The future of energy in India is green—and it's happening today thanks to vision-driven enterprises like Bioflare. Committed entirely to innovation, sustainability, and making an impact, Bioflare Renewable Energy Private Limited invites investors, entrepreneurs, and communities to be part of making a cleaner, smarter, and more self-sufficient India.

This is not just business—it's a collective passion for the planet, the people, and the hope of a sustainable future.

Bioflare Renewable Energy Private Limited

Powering a Greener Tomorrow. Today!

BioFlare
Renewable Energy
Empower Green Future

BENEFITS OF COMPRESSED BIO GAS (CBG) OVER PETROL OR DIESEL

- COST EFFECTIVE**
Low Fuel Cost | Less Engine Wear
- ENVIRONMENT FRIENDLY**
Low emissions | Lower carbon footprint
- EFFICIENCY & PERFORMANCE**
Better Combustion | Quiet Operation
- SAFETY**
Lighter than air | Higher Ignition temperature

Benefits of Investing in a CBG Plant

- Government Backing & Subsidies**
Strong support under scheme like SATAT. Attractive subsidies, tax benefits and assured offtake agreements with OMCs.
- Waste to Wealth Opportunity**
Converts agricultural residue, animal dung, and organic waste into valuable energy while solving both waste disposal and fuel shortage problems simultaneously.
- Green Energy - High Demand**
CBG is a clean renewable fuel with rising demand in automotive and industrial sectors, aligning with India's Net-Zero carbon goals by 2070 and global green transition strategies.
- Local Employment & Rural Development**
Generates rural employment, promotes inclusive growth. Boosts local economies, supports farmers by purchasing agri-waste.
- Consistent Revenue Streams**
Multiple revenue sources: CBG sales, fermented organic manure (FOM), CO₂ extraction and waste processing charges, long-term purchase agreements.
- Future-Proof Business**
Part of the evolving bio-economy, increasingly attractive to ESG investors and sustainable funds.

India's CBG production crosses 300 TPD in 2025, driven by new biogas plants and government incentives

Clean energy from organic waste

- Govt Approved
- High ROI
- Buyback Model

- Ideal for vehicles & industries
- Full support from BioFlare - from setup to success!
