

Blake and Boughton Sets New Benchmark in Weighbridge Calibration Across the UK

Blake and Boughton is redefining precision with expert weighbridge calibration and advanced calibration of weighing scale services—empowering industries with accuracy, compliance, and reliability.

Thetford, Norfolk Jul 23, 2025 ([Issuewire.com](https://www.issuewire.com)) - In a world where industrial accuracy defines success, **Blake and Boughton** emerges as a frontrunner in [weighbridge calibration](#) services across the UK. With over 80 years of engineering and metrology experience, the company continues to deliver unmatched reliability and compliance for commercial, agricultural, and industrial weighing systems.

As industries tighten quality control standards, the demand for certified and precise calibration solutions has never been greater. Blake and Boughton answers this need with UKAS-traceable calibration procedures, delivered by experienced technicians and supported by cutting-edge equipment.

“Our mission is to ensure that every client—no matter the size or sector—receives trusted accuracy,” says a spokesperson for Blake and Boughton. “From high-capacity weighbridges to portable scales, our

calibration of weighing scale service guarantees compliance with national and international standards.”

Blake and Boughton’s **weighbridge calibration** service includes on-site testing using test units and certified test weights, full documentation with calibration certificates, and prompt scheduling to minimise operational disruption. Their process helps clients avoid fines, reduce errors, and meet legal-for-trade requirements.

In addition to weighbridges, the company calibrates laboratory balances, platform scales, moisture analysers, and custom weighing equipment. With ISO 9001 certification and a reputation built on trust, Blake and Boughton is the go-to provider for companies prioritising performance and accuracy.

Industries served include agriculture, logistics, waste management, food processing, and pharmaceuticals—each benefiting from reliable measurement integrity and legal compliance.

With operations extending across the Midlands and beyond, Blake and Boughton continues to raise the bar for **weighbridge calibration** and [calibration of weighing scale](#) services in the UK.

About Blake and Boughton

Blake and Boughton is a trusted name in weighing solutions, specialising in the sale, service, hire, and calibration of industrial and laboratory weighing equipment. With a legacy dating back to 1939, the company combines deep technical knowledge with modern practices to deliver precision and peace of mind to its clients.
