

BodyGuard Unleashes YardGuard: A Powerful, Eco-Friendly Bug Spray That Protects Your Backyard Naturally

Fort Myers Beach, Florida Jul 15, 2025 ([Issuewire.com](https://www.Issuewire.com)) - As summer hits its peak and mosquitoes make themselves unwelcome guests at outdoor events, **BodyGuard** is stepping up with a new solution: [YardGuard](#), an environmentally conscious yard spray designed to reclaim your outdoor spaces without the use of harsh chemicals.

Formulated with natural essential oils and botanical ingredients, **YardGuard** targets mosquitoes, ticks, fleas, and other common outdoor pests — all without leaving behind a cloud of synthetic toxins. Perfect for backyard BBQs, garden lounging, or letting your kids and pets run wild, YardGuard is a safe and effective alternative to traditional yard sprays.

“We created YardGuard because people shouldn’t have to choose between enjoying their backyard and avoiding toxic chemicals,” said a BodyGuard spokesperson. **“It’s tough on bugs, but easy on everything else — your skin, your pets, your garden, and the planet.”**

Each [YardGuard bottle](#) covers large outdoor areas and is designed for quick, hassle-free application. With a refreshing herbal scent and long-lasting protection, YardGuard makes it easy to enjoy summer nights without itchy distractions.

Key Features:

- Powered by natural essential oils — no DEET, pyrethrins, or permethrin
- Safe for kids, pets, and pollinators
- Covers patios, lawns, gardens, and outdoor furniture
- Made in the USA with biodegradable ingredients

Whether you’re a suburban homeowner, a weekend griller, or a backyard gardener tired of swatting and scratching, **YardGuard** is your new favorite outdoor weapon.

YardGuard is available now exclusively at
