

BSTR Miner integrates Ripple's XRP to launch exclusive cloud mining contracts

The world's first cloud mining platform that supports XRP payment and income settlement, and simultaneously launches a flexible XRP mining product matrix

Cleveland, Aberdeen Jul 14, 2025 ([Issuewire.com](https://www.issuewire.com)) - BSTR Miner, the world's leading cloud mining service provider, announced today that it has completed technical integration with the Ripple payment network and officially incorporated XRP into the core payment and income settlement system. Users can now directly use XRP to purchase cloud mining computing power contracts. The platform simultaneously launched an exclusive [XRP mining](#) product line, and all mining income will be automatically converted into XRP for real-time distribution, achieving a revolutionary improvement in capital efficiency.

XRP full ecosystem integration: payment + income + exclusive contract

BSTR Miner innovatively achieves triple integration:

XRP payment: using the Ripple network's 3-5 seconds ultra-fast settlement and nearly zero transaction costs, completely replacing traditional high-fee payment channels

XRP income settlement: daily Bitcoin, Ethereum, and other mining income are automatically converted into XRP and distributed to user wallets

XRP mining contract matrix: multiple new XRP directional mining contracts have been added, including

10/30/60 days flexible cycle and differentiated computing power configuration

Starting today, new users can enjoy \$10 experience gold when registering, which can be directly deducted from any mining contract fee.

Empowering XRP's practical value ecosystem

"This is not only an upgrade in payment methods, but also a breakthrough in the XRP asset appreciation scenario," said John Carter, CEO of BSTR Miner. "The XRP-exclusive contract we designed allows holders to directly participate in the mining ecosystem while enjoying the speed bonus of the Ripple network. The new user bonus program will accelerate global user participation."

Ripple's Asia-Pacific business head Raj Patel commented: "BSTR Miner's innovative integration has created a real business demand scenario for XRP. This 'payment-income-asset appreciation' closed loop will promote a wider range of ecological applications."

Experience the XRP mining ecosystem immediately

Users can log in to the BSTR Miner official website (www.bstrminer.com):

- ☐ Receive \$10 new user registration bonus
- ☐ Use XRP to pay for Bitcoin/Ethereum/XRP exclusive mining contracts
- ☐ Enjoy 0 management fee discounts

Security and sustainability

The platform adopts an ISO 27001-certified security architecture, and 95% of assets are stored in offline cold wallets. All mines are certified for renewable energy, and carbon emissions per cabinet are 40% lower than the industry standard.

About BSTR Miner

As a compliant cloud mining platform covering 180 countries, BSTR Miner is known for its zero hidden fees, real-time revenue visualization, and carbon-neutral operations, and has processed more than \$375 million in mining revenue.
