

Charge Home Solutions Expands EV Charger, Powerwall, and Solar Installations Nationwide

Now serving all 50 U.S. states, Charge Home Solutions offers certified installation of Tesla Powerwall 3, solar panels, and Level 2 EV chargers for all vehicle brands.

New York City, New York Jul 3, 2025 ([IssueWire.com](https://www.issuewire.com)) - Charge Home Solutions, a Tesla Certified Installer, has expanded its home energy services to all 50 U.S. states. The company now offers fast, licensed installation of Level 2 EV chargers, Tesla Powerwall 3 battery systems, and full solar panel setups.

Known for its national reach and 48-hour average installation time, Charge Home Solutions has built a network of over 4,600 licensed electricians and energy technicians. Their services are available to owners of all major EV brands—including Tesla, Rivian, Ford, BMW, Lucid, Kia, and more.

“Whether you’re charging a Tesla or preparing for grid outages with Powerwall and solar, our team delivers a fast and insured installation backed by permits and inspections,” says CEO Ariel Asayag.

Charge Home Solutions handles all permitting and utility requirements, offering insured and code-compliant installs. Their work is backed by strong customer service, affordable pricing, and a mission to help Americans achieve energy independence.

Customers can now request a free estimate nationwide for EV charger setup, Powerwall 3 installation, or complete solar systems for their home.
