

Corporate America Relocation Services Launches SaaS CARSGPT™ Global Mobility Platform

Redefines the \$30B Relocation Industry with AI-Driven Automation, Compliance, and Enterprise Mobility

Houston, Texas Jul 20, 2025 ([IssueWire.com](https://www.issuewire.com)) - Corporate America Relocation Services (CARS) Launches CARSGPT™ to Redefine the \$30B Relocation Industry with AI-Driven Automation, Compliance, and Enterprise Mobility

Corporate America Relocation Services (CARS), a next-generation provider of relocation and mobility management solutions, has officially launched **CARSGPT™**, the first AI-powered SaaS platform designed to modernize employee relocation for corporations, government agencies, and military families.

Built from the ground up with security, speed, and compliance in mind, CARSGPT™ offers a powerful alternative to legacy relocation platforms by unifying logistics, policy management, vendor automation, and real-time analytics into a single enterprise-grade system.

Relocation, Reinvented with AI

CARSGPT™ empowers HR teams, transferees, and relocation vendors with tools that automate tier-based relocation benefits, real estate coordination, household goods tracking, IRS/GSA compliance, and federal documentation—all within a secure, intuitive platform.

“CARSGPT™ isn’t just a product—it’s the new operating system for modern mobility,” said [Founder Name], CEO of CARS. “We’ve built an infrastructure where relocation is seamless, secure, and compliant—whether you’re moving talent across town or across continents.”

Who It's Built For

- Enterprise HR and procurement teams managing national and global employee mobility
- Federal and defense agencies overseeing PCS and civilian transfers
- Relocation vendors and brokers seeking digital workflow integration

- Military families navigating complex move logistics and entitlements

Key Features of CARSGPT™

- Configurable Tier Engine: Automate relocation policies by employee role, rank, or location
- IRS/GSA/DoD Compliance Hub: Auto-generate required forms and maintain audit trails
- Vendor Matching AI: Assign pre-certified vendors based on move type, location, and employee preferences
- CARS Insights™ Dashboard: Visualize cost savings, satisfaction scores, and relocation metrics in real time
- Secure Infrastructure: FedRAMP-ready architecture, SOC 2 roadmap, and ITAR controls for defense-grade protection

Backed by a Scalable Growth Plan

With a forecasted revenue trajectory from \$0 to \$35M+ by 2033, CARS is executing a multi-sector strategy that includes government contracts, SaaS licensing, real estate commissions, and vendor margin capture. The company is currently raising a **\$2M–\$5M SAFE round** to expand its team, federal onboarding capabilities, and client acquisition.

Media, Investors, and Partners

CARS is actively seeking pilot clients, strategic investors, and ecosystem partners. For media inquiries, product demos, or investment materials, visit:
