

Crafted 3D Signs Launches Custom Branded Shirts & 3D Wall Art for Modern Businesses

Miami, Florida Jul 23, 2025 ([Issuewire.com](https://www.issuewire.com)) - Crafted 3D Signs, widely known for turning company logos into standout 3D signs, is now offering two new ways for businesses to express their brand: custom shirts and 3D wall art.

This new offering builds on what the company already does best, creating physical representations of a brand's story. The expansion marks a simple but meaningful shift: from just the front wall to the full workplace and even the people who represent the brand every day.

More Than a Sign on the Wall

Founded by Jennifer Arniella, an engineer turned creative entrepreneur, [Crafted 3D Signs](https://www.crafted3dsigns.com) has long focused on detail, design, and service. With the addition of custom apparel and wall art, the company is helping businesses go beyond a single logo display and toward a more complete branded environment.

"Our work has always been about helping businesses show who they are," said Arniella. "Now, we're doing that not just through signs, but also through what people wear and what surrounds them."

Shirts That Speak for Your Brand

The new line of branded shirts includes carefully chosen materials and styles suited for teams, events, or retail use. Logos, colors, and messaging are matched with precision to ensure the shirts reflect the same standards as the signs that leave their studio.

Wall Art That Tells a Story

Crafted 3D Signs is also launching [custom wall art](#) designed to add personality to workspaces, lobbies, and stores. Made from wood, acrylic, or metal composites, these pieces are cut with the same laser precision and finished by hand, just like their signage.

Same Care, More Ways to Show Who You Are

Mockups are shared before anything goes into production. Timelines stay tight, and customer service remains personal. A logo behind the front desk, a mural on the office wall, or shirts worn at a trade show, Crafted 3D Signs wants each item to feel like it belongs.

About Crafted 3D Signs

Crafted 3D Signs is a Miami-based design studio specializing in 3D logo signs for modern businesses. They offer wall-mounted interior signs, outdoor storefront displays, and now branded apparel and dimensional art. Every product is built with a mix of technology and hand-finishing, always tailored to fit the look and feel of each client.
