

Decrypt Compliance Reinforces Its Expertise in SOC Services, Offering Trusted, Human-Centric Guidance for Businesses

San Jose, California Jul 4, 2025 ([IssueWire.com](https://www.issuewire.com)) - In today's rapidly evolving digital ecosystem, trust has become a business currency and Decrypt Compliance is helping companies earn it. As businesses increasingly prioritize data security and compliance readiness, **Decrypt Compliance** is proud to expand its suite of **SOC services**, with a refined focus on **SOC 2 compliance** and

personalized, audit-ready support across **SOC 1, SOC 2 and SOC 3** frameworks.

Led by CPA and audit expert Raymond Cheng, Decrypt Compliance has been working quietly behind the scenes, supporting organizations that want to go beyond just “meeting standards.” Their mission is to help clients feel confident and well-prepared when navigating the complexities of **SOC 2 compliance** and to do so with a partner who speaks their language not just auditor jargon.

“For us, compliance is not just paperwork, it’s a reflection of a company’s integrity and the way they value customer trust,” says Cheng. “Our goal is to make the process less intimidating and more empowering, especially for growing businesses that are doing this for the first time.”

SOC Compliance, Simplified and Personalized

Decrypt Compliance’s [SOC Services page](#) now offers a deeper look into the firm’s human-first approach to audit preparedness and reporting. Whether it’s **SOC 1 reporting** for companies handling sensitive financial information, **SOC 2 compliance services** for SaaS and cloud-native platforms, or public-facing **SOC 3 reports**, the team helps clients map out clear, actionable paths toward certification.

Rather than offering cookie-cutter templates, Decrypt takes time to understand each company’s specific operational processes and risk profiles. From readiness assessments to gap analysis, documentation support to auditor coordination, every step is handled with a calm, collaborative mindset.

“Our clients appreciate that we don’t overcomplicate things,” explains Cheng. “We provide clarity and structure, but with the flexibility to adapt to how their business actually works.”

This personalized approach makes Decrypt especially valuable to industries such as:

- **SaaS & Cloud Platforms**
- **Fintech and Financial Services**
- **Healthcare and HealthTech**
- **E-commerce and Logistics**
- **Managed Service Providers (MSPs)**

Why SOC 2 Compliance Matters More Than Ever

With rising regulatory expectations and an increasing number of security-conscious customers, **SOC 2 compliance** has quickly become a foundational trust signal for digital businesses. But for many companies, the process feels overwhelming, especially without in-house audit expertise.

Decrypt Compliance steps in as a partner, not just a vendor. They walk each client through the **SOC 2 Trust Services Criteria** (Security, Availability, Processing Integrity, Confidentiality and Privacy), ensuring that internal controls are not only in place but also aligned with business goals.

Their **SOC 2 compliance services** include:

- Gap assessments and readiness planning
- Risk identification and remediation planning
- Custom control design and documentation
- Evidence collection and audit liaison support
- Continuous compliance guidance post-audit

Importantly, the Decrypt team avoids rigid frameworks. Instead, they tailor each compliance roadmap to the organization's culture, scale and future growth plans and helping teams build stronger operations along the way.

Full-Spectrum SOC Services: SOC 1, SOC 2, and SOC 3

For businesses seeking third-party assurance beyond **SOC 2**, Decrypt Compliance also offers support for:

- **SOC 1 Type I & Type II Reports** – Focused on internal controls over financial reporting (ICFR)
- **SOC 2 Type I & Type II Reports** – For service organizations handling customer data and infrastructure
- **SOC 3 Reports** – Public-facing summaries of SOC 2 audits for marketing or partner use

These **SOC services** are delivered with full transparency, clear documentation and ongoing support—removing the guesswork from what is often considered one of the most challenging parts of the compliance lifecycle.

“SOC audits can feel like a black box,” notes Cheng. “We open that box, explain everything in plain language, and make sure our clients are never left wondering what's next.”

A Trusted Compliance Partner for Growing Companies

Decrypt Compliance is not just an audit prep service, it's a strategic partner committed to helping businesses grow with confidence. Their team has worked with startups, mid-size firms, and enterprise-level companies, offering the same level of respect, detail and support to every engagement.

Clients often turn to Decrypt after being overwhelmed by larger firms that take a generic, checklist-driven approach. With Decrypt, the experience feels different: more thoughtful, more human and always focused on long-term success not just passing an audit.

About Decrypt Compliance

Decrypt Compliance is a CPA-led firm offering specialized **SOC compliance services** to businesses navigating cybersecurity audits and data protection regulations. With a strong focus on **SOC 2 compliance**, the firm supports companies through every stage of the audit journey from readiness to

reporting, providing clear guidance, tailored documentation and hands-on support throughout.

Decrypt is known for its personalized approach, deep technical expertise and commitment to making compliance a strength not a stress point. Their services are designed for modern businesses that want to build trust with customers, investors and partners while reinforcing their internal operations.
