

Earthrings Launches Eco-Friendly Six-Pack Rings to Replace Plastic Packaging

A sustainable, compostable, and shelf-ready solution for beverage brands looking to ditch single-use plastic.

Elgin, Illinois Jul 31, 2025 ([Issuewire.com](https://www.issuewire.com)) - Earthrings, a leader in sustainable packaging solutions, announces the release of its 100% recyclable and compostable [six-pack rings](#) designed for beverage brands, breweries, and distributors. These moisture-resistant, plant-based carriers are engineered to

meet the demands of both shelf presentation and environmental responsibility.

With plastic pollution becoming a global crisis, Earthrings has developed an alternative to traditional plastic beverage rings. The new six-pack carrier rings are made from compostable materials and offer a practical, durable solution for packaging canned beverages like beer, seltzers, and soft drinks.

Earthrings are built to resist moisture, perform under pressure, and maintain their structure from production to shelf. They accommodate both 12oz and 16oz cans and are compatible with both manual and automated application systems, including the popular CB MINI 6-PACKER—a compact tabletop unit ideal for small to mid-size breweries. These six-pack rings not only meet industry standards but exceed consumer expectations for sustainability.

Ideal for breweries and beverage distributors looking to reduce their plastic footprint, Earthrings offers a packaging upgrade that doesn't compromise performance or shelf appeal. With growing demand for eco-conscious products, this launch couldn't come at a better time.

About Earthrings :

Earthrings is a sustainable packaging company committed to eliminating single-use plastic from the beverage industry. Its signature product line includes recyclable, compostable multi-pack rings made for six-packs, eight-packs, and more, and works seamlessly with solutions like the CB MINI 6-PACKER applicator for efficient, small-batch production.
