Fiybit and Wealvox Announce Comprehensive Strategic Partnership

Core Areas of Strategic Collaboration This partnership goes far beyond simple traffic sharing or functional integration — it involves a full-stack synergy from infrastructure to user services.

Avondale, Arizona Jul 23, 2025 (Issuewire.com) - Fiybit and Wealvox Announce Comprehensive Strategic Partnership

In a critical period marked by rapid evolution in global digital finance and a redefinition of user trust, global cryptocurrency exchange Fiybit and Al-driven investment technology firm Wealvox have officially announced a comprehensive strategic partnership. The collaboration aims to integrate both parties' strengths across trading infrastructure, Al-powered risk control, regulatory compliance technology, and global asset allocation, jointly building a next-generation, trustworthy digital financial ecosystem.

- 1. Deep Integration of AI Risk Control with Trading Platform
- Wealvox will incorporate its proprietary AI behavioral identification models and quantitative alert systems into Fiybit's exchange framework. This integration will enable real-time anomaly detection, risk quantification, and automatic defense mechanisms, significantly improving trading security and platform stability.
- 2. Co-developing Intelligent Asset Allocation & Copy-Trading Services
 Fiybit will launch a new "Smart Portfolio Copy-Trading System" powered by Wealvox, offering retail
 users institutional-grade strategy replication. From asset allocation and rebalancing notifications to risk
 alerts, users will benefit from a seamless, one-stop investment experience.

3. Joint Expansion of Global Compliance Licensing

Fiybit, which holds a U.S. FinCEN MSB license and is expanding into Asia, the Middle East, and Europe, will work with Wealvox's established international compliance network. Together, they will advance a global compliance framework and accelerate localized regulatory capabilities across multiple jurisdictions.

4. Establishing a Joint User Education & Data Research Center

The two companies will co-found the "Web3 Intelligent Finance Research Alliance" to publish forward-looking market sentiment indices, on-chain user behavior insights, and investor trend analyses — offering valuable data perspectives to the entire industry.

Over the past five years, while the digital asset industry has grown rapidly, it has also been plagued by security breaches, opaque algorithms, and compliance gaps. The Fiybit–Wealvox partnership marks a pivotal shift — elevating crypto exchanges from being mere functional platforms to becoming credible financial infrastructure grounded in a "user-centric, security-first, AI-powered" paradigm.

"User trust in trading platforms must be founded on both technological transparency and risk controllability. Our partnership with Wealvox represents a systematic reimagination of the future of exchanges."

"We believe true long-term user trust in the Web3 era will only be built by combining fintech capabilities with on-chain compliance and transparency. Fiybit is one of the few platforms truly committed to long-termism."

Next 6-Month Joint Roadmap

Launch of co-branded intelligent asset strategy tools

Testing of cross-chain asset tracking and behavioral risk control system

Simultaneous regulatory expansion in South America, the Middle East, and Europe

Preparation of an "Open Data API Program" for developers and professional users

Fiybit is a rising global digital asset exchange focused on asset sovereignty, secure trading experiences, and global compliance development. It is committed to becoming a Web3 financial hub for the future. www.fiybit.com

Wealvox is an AI-powered intelligent investment firm specializing in long-term value strategies, portfolio algorithms, and risk modeling systems, serving both retail and institutional investors worldwide. www.wealvox.com
