

FORCHICS: Minimalist Alpine Lip Care for Temperature Extremes & Lip Woes

Cusset, Allier Aug 11, 2025 ([Issuewire.com](https://www.issuewire.com)) - -28°C & Chapped lips in the 38°C sunlight & Dull lips? FORCHICS by XIN GUO, LIN: Redefining Alpine Lip Care with "Less is More"

FORCHICS 'brand-new plump lip care essence, founded by XIN GUO LIN, has gained popularity from Los Angeles to Europe. With the concept of "less is more," it has redefined the standards for high-altitude lip care, easily addressing issues such as chapped lips caused by -28°C cold and dull lip color under 38°C scorching sun.

This formula, certified by an independent laboratory in Paris, adheres to the principles of veganism and zero cruelty and refuses animal ingredients and testing. The 11 versatile shades each have their own unique features: Bare Honey brings a soft glow for daily use, while Bare Cocoa is perfect for an elegant dinner party. Every touch gives the lips a natural and full glow.

Its core advantage lies in the "glacier shield," formed by the extract of Alpine Leonurus and the active ingredients of glacier water, which can lock in moisture for 24 hours and continuously protect the lips under extreme temperature differences. For European minimalist beauty enthusiasts who prioritize quality over superficiality, it is an ideal choice for commuting, meetings, and social occasions. It requires no complicated procedures and exudes composure.

Currently, it is exclusively available in Paris. Log in to forcics.vip to own it. Let every application be a tribute to the true beauty. (Born for sophisticated women, founded by XIN GUO LIN, certified by an independent laboratory in Paris, vegan and cruelty-free)
