

Getzshape Launches to Redefine Precision CNC Machining Manufacturer for Demanding Industries

Getzshape

Shenzhen, Guangdong Jul 30, 2025 ([IssueWire.com](https://www.issuewire.com)) - Getzshape announced its official launch today, entering the market as an innovative CNC machining manufacturer poised to solve the industry's most demanding production challenges. Founded in 2025, the company operates a state-of-the-art smart factory to deliver unprecedented speed, transparency, and precision for clients in the aerospace, medical technology, robotics, and advanced electronics sectors.

Getzshape was established by a team of manufacturing and technology veterans to address critical gaps in the supply chain: slow quoting cycles, a lack of project transparency, and the difficulty of sourcing highly complex components on demand. The company's integrated solution offers an end-to-end manufacturing experience, from quick quoting to final part delivery.

"We saw a clear opportunity to build a manufacturing partner from the ground up, specifically for the demands of the 21st century," said Lei Yang, Founder of Getzshape. "Legacy systems can't keep pace with the speed of modern innovation. We're not just making parts; we're building a smarter, faster, and more transparent manufacturing experience for the engineers who are shaping the future."

At the heart of Getzshape's operation is a suite of brand-new, state-of-the-art equipment, including advanced 5-axis machining centers, high-speed CNC turning lathes, and advanced metrology systems. This physical infrastructure is seamlessly integrated to provide clients with direct communication and data-rich quality assurance processes.

Getzshape's core services at launch include:

Multi-Axis CNC Milling & Turning: For complex geometries and high-precision components.

Rapid Prototyping: Accelerating product development cycles with functional, production-quality prototypes.

Engineering Consultation: Design for Manufacturability (DFM) support to optimize parts for efficiency and performance.

From day one, Getzshape is launching with a deep commitment to customer partnership and radical transparency. The company's processes are being built to meet and exceed the highest industry standards, and it has already achieved ISO 9001:2015 certification to formalize its dedication to world-class quality.

About Getzshape

Getzshape is a global provider of precision CNC machining and custom manufacturing services. Specializing in CNC milling, turning, and EDM machining, the company serves a wide range of industries such as aerospace, medical devices, robotics, and consumer electronics. With a commitment to consistent quality and customer success, Getzshape transforms complex engineering designs into physical parts.
