

## HitechDigital Featured in Forbes India's 'Innovative Companies in India 2025'

Global technology services leader showcased for AI-driven solution that processes 155 million property records with 80% efficiency gain.

**Ahmedabad, Gujarat Jul 9, 2025** ([Issuewire.com](https://www.issuewire.com)) - [HitechDigital Solutions](https://www.hitechdigital.com), a leading name in AI-powered data and engineering services, was recently featured in Forbes India's article on "Innovative Companies in India 2025." The article highlights how we developed an AI-based data extraction system that structured 155 million property records for a major US real estate client, cutting processing time by

80%.

Published on Forbes India's digital platform, the article places HitechDigital among a select group of companies reshaping India's tech space with bold ideas and disruptive tools. It also traces our journey from a traditional service provider to a tech-driven innovator over the past 32 years.

"Being featured in Forbes India validates over 30 years of our commitment to innovation and quality," said Ashish Joshi, Director at HitechDigital Solutions. "The AI solution we built to process millions of property records shows how we solve problems that older methods just can't handle well. With over 1,200 skilled professionals across 4 countries, we're proud to keep a 95% client retention rate by consistently delivering results that matter."

The Forbes India article highlights several important aspects of HitechDigital's business:

**Technological Innovation:** Our proprietary AI-powered data extraction system is a major step forward in managing massive datasets. Processing 155 million property records with an 80% time cut shows what happens when deep domain knowledge meets advanced AI.

**Global Presence:** With operations in India, the USA, the UK and the Netherlands, we serve over 300 clients in more than 50 countries. That reach allows us to deliver enterprise-level solutions wherever they're needed.

**Comprehensive Service Portfolio:** The article on Forbes points out our strengths in Text Analytics, Image and Video Analytics, Product Engineering and Building Information Modeling (BIM) Services. This positions us as a full-service technology partner.

**Industry Leadership:** A client retention rate above 95% over 3 decades says a lot. It shows our focus on long-term partnerships and consistent value across industries like manufacturing, construction, real estate and tech.

Founded in 1992 by first-generation entrepreneur Pranit Banthia, HitechDigital has built its name on constant reinvention and scalable models. Forbes India recognized Banthia's vision—blending deep domain knowledge with tech innovation to solve real business problems.

Our inclusion in Forbes India's innovation feature comes during a time of strong growth. With a team of over 1,200 professionals and a growing global footprint, we continue to invest in AI and automation tools that help clients scale digital transformation.

HitechDigital's story, as told in Forbes India, is a reminder that Indian tech companies can make a global impact through innovation and persistence.
