Hyderabad, Telangana Jul 3, 2025 (Issuewire.com) - Picking the right makeup isn't just about following trends—it's about finding shades and styles that truly complement your skin tone and bring out your natural beauty. Whether you're getting ready for a big event or just want to elevate your everyday look, knowing what works best for your complexion makes all the difference. At [Cocoon Salon Mokila](#), one of the most **famous beauty parlours in Mokila**, experienced makeup artists focus on helping you

find the perfect match for your skin tone, so you always leave feeling confident and radiant.

First, Know Your Skin Tone & Undertone

Before diving into products, it's important to understand two things:

- **Skin tone** (light, medium, dark)
- **Undertone** (cool, warm, neutral)

A quick way to check? Look at the veins on your wrist—if they appear blue or purple, you likely have cool undertones; greenish veins point to warm, and if you see both, you may be neutral. Not sure? The experts at **Cocoon Salon**, a trusted **hair and makeup salon in Mokila**, can help you figure it out and recommend makeup that suits you perfectly.

Makeup Tips Based on Your Skin Tone For Fair to Light Skin:

- **Go for:** Ivory foundations, rosy blushes, and pink or peachy lipsticks.
- **Avoid:** Harsh, dark shades that can wash you out.
- **Try:** Soft eye makeup with browns, taupes, and cool-toned shadows.

At **Cocoon**, one of the top **ladies' parlours in Mokila**, makeup artists use soft and fresh palettes to bring a natural glow to lighter complexions—especially popular with brides during pre-wedding trials.

For Medium or Wheatish Skin:

- **Go for:** Warm beige or golden foundations, peach blushes, coral or berry lipsticks.
- **Avoid:** Overly cool tones that make the skin look dull.
- **Try:** Bronze eyeshadows or olive tones to bring out your features.

This is one of the most common skin tones in India, and stylists at this **unisex salon in Mokila** are well-versed in picking the right balance of warm and bright shades to enhance your glow.

For Dusky to Deep Skin:

- **Go for:** Caramel, mocha, or espresso foundations; bold blushes like brick red or tangerine; deep lip shades like plum, wine, or rich browns.
- **Avoid:** Light or chalky colors that make the skin look ashy.

- **Try:** Rich eyeshadows like gold, burgundy, or jewel tones.

Cocoon—widely regarded as one of the **top beauty parlours in Mokila** and a top **Hyderabad salon**—knows how to highlight the richness of deep skin tones with stunning, vibrant makeup looks that pop.
