

HPY Token Global IDO Launch: A 6-Day Wealth Window Anchored to Real-World Assets Officially Opens

Singapore, Singapore Jul 5, 2025 ([Issuewire.com](https://www.issuewire.com)) - As over 50 core patents from the globally leading biopharmaceutical institution, the U.S.-based Fosun Biopharma Foundation, are being transformed into medical breakthroughs in laboratories, the value of these real-world assets is being redefined by blockchain. Strategically incubated by the foundation, **HPY Token**—the first digital currency deeply anchored to real-world assets (RWA)—will launch its global Initial DEX Offering (IDO) on **HAPPY Exchange** from **July 3 to July 8, 2025**. These six days represent more than just a subscription window for digital tokens; they mark a golden opportunity to share in the tangible benefits of the biopharmaceutical industry.

HPY's disruptive value stems from the comprehensive empowerment of RWAs. Unlike traditional cryptocurrencies, it is underpinned by tangible assets such as the Fosun Biopharma Foundation's patent portfolio and revenue-sharing rights with over 100 global pharmaceutical companies. Through blockchain technology, these assets are digitized, enabling a unique "real-world assets on-chain" model. HPY thus serves as a bridge between pharmaceutical laboratories and digital finance—you are not merely purchasing tokens, but securing future returns from anti-tumor drug patents and on-chain equity in innovative vaccine development.

As the first ecological asset on HAPPY Exchange, HPY enjoys **three powerful growth drivers**: a cutting-edge patent matrix from Fosun Foundation forming a strong technological moat; full-platform exposure and traffic from the exchange powering liquidity; and most importantly, its RWA anchoring mechanism, which protects HPY from the speculative bubbles of virtual currencies. Its value fluctuation

is strongly tied to the real-world growth of the biopharma sector. Holding HPY means owning a digital asset backed by 50 patents and a global network of pharmaceutical collaborations, along with long-term ecosystem benefits from a permanent seat within the exchange's infrastructure.

The IDO officially begins on **July 3** and ends at **24:00 on July 8**. During this limited 6-day window, **early participants on Day 1 will receive the highest whitelist privileges**. Join now to secure early access and claim your entry ticket into this wealth revolution—powered by real-world assets and digital finance. After the IDO window closes on July 8, the threshold for entry into the ecosystem will significantly increase.
