

ITAM India Launches Education and Certification Programs in IT Asset Management, FinOps

iTAM India - IT Asset Management offers industry-leading ITAM training designed for professionals seeking to manage IT assets efficiently. Our courses cover best practices, lifecycle management, and compliance strategies.

Mumbai, Maharashtra Jul 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - *ITAM India*, a new venture by Rythium Technologies, has officially launched its education and certification platform to upskill India's technology workforce in four high-demand domains: **[IT Asset Management \(ITAM\)](#), [FinOps](#), [Cybersecurity](#), and [IT Operations Management \(ITOM\)](#)**.

With the rapid digitization of Indian enterprises and an increasing reliance on cloud, software, and digital infrastructure, professionals with specialized knowledge in IT governance, cost optimization, security, and operational control are in high demand. ITAM India's programs are designed to equip IT professionals, procurement managers, finance teams, and security personnel with **practical, real-world training** and **globally relevant certification**.

"India's IT workforce is world-class, but there's a growing gap in mid-career and specialist skills in areas like asset compliance, cloud cost control, and security risk management," said Sheshagiri Anegondi, Managing Partner at Rythium Technologies. "Our goal is to close this gap by offering education that goes beyond theory — training that's rooted in actual practices used by top IT and InfoSec teams globally."

ITAM India's instructor-led and on-demand courses cover critical topics such as software license compliance, vendor negotiations, cloud cost visibility (FinOps), configuration management databases (CMDB), and software bill of materials (SBOM). These programs are especially relevant for professionals working in **enterprise IT teams, system integrators, cloud operations, managed service providers**, and **government digital initiatives**.

Professionals who complete these certifications can expect **higher career mobility, attractive salaries, and international job opportunities**. As organizations increasingly value governance and transparency in technology operations, certified specialists in ITAM, FinOps, and Cybersecurity are seeing salary premiums of **30% to 50% more** than their uncertified peers.
