

Jesus F. Martinez, MD: Advancing Neurological Care with Compassion and Expertise

Bridging Patient Care and Medical Education at Regional One Health and The University of Tennessee Health Science Center

New York City, New York Jul 30, 2025 ([Issuewire.com](https://www.issuewire.com)) - Regional One Health is proud to announce the continued excellence of Jesus F. Martinez, MD, a dedicated neurologist based at the East Campus

in Memphis, Tennessee. With a profound commitment to improving the lives of his patients, Dr. Martinez emphasizes the importance of understanding neurological conditions through patient education, which he believes is key to effective management and treatment.

"My favorite part of being a physician is getting to know my patients and having a positive impact on their lives," Dr. Martinez stated. This philosophy drives his approach to patient care, where he not only treats neurological conditions but also empowers his patients with knowledge about their health.

In addition to his role as a practicing neurologist, Dr. Martinez serves as an Instructor in the Department of Neurology at The University of Tennessee Health Science Center. Through this position, he instills the significance of patient education into the next generation of healthcare professionals. "Education is empowering," he noted. "The more a person understands their condition, the easier it will be to deal with it on a daily and long-term basis."

Dr. Martinez earned his Medical Degree from the University of El Salvador School of Medicine before moving to the United States, where he completed an internship in internal medicine at Greenwich Hospital in Connecticut. He further honed his skills during his residency in neurology at North Shore University Hospital in Manhasset, New York, followed by a prestigious fellowship in experimental and clinical epilepsy and neurophysiology at the University of Virginia Health Sciences Center in Charlottesville, Virginia.

"The University of Virginia Epilepsy Program was one of the first three created in the country. I am glad and proud to have trained there," Dr. Martinez said. His passion for epilepsy and seizure disorders is evident, as he expresses a deep commitment to helping patients navigate these challenging conditions. "While I see and treat all kinds of neurological conditions, epilepsy and seizure disorders have a special place in my heart, and I am particularly well equipped to help those patients."

Board-certified in neurology, epilepsy, and clinical neurophysiology, Dr. Martinez's dedication to patient care and education makes him an invaluable asset to Regional One Health and the Memphis community. As he continues to provide exceptional care, he remains focused on advancing the field of neurology and improving patient outcomes for all those he serves.
