

LoopNote Meet Launches as a Lightweight Fireflies.ai Alternative for VCs, Founders, and Remote Teams

A new AI meeting bot emerges as a simpler, more affordable alternative to Fireflies.ai.

Austin, Texas Jul 6, 2025 ([IssueWire.com](https://www.issuewire.com)) - Tech Assistor Corporation has officially launched [LoopNote Meet](#), an AI meeting assistant bot that's quickly becoming a go-to alternative to Fireflies.ai. Designed for professionals who want a simple, affordable way to automate meeting notes and action items, LoopNote Meet is now live.

LoopNote Meet automatically joins your Zoom, Google Meet, Microsoft Teams and Slack Huddle calls as a bot — recording, transcribing, and summarizing meetings without any manual input.

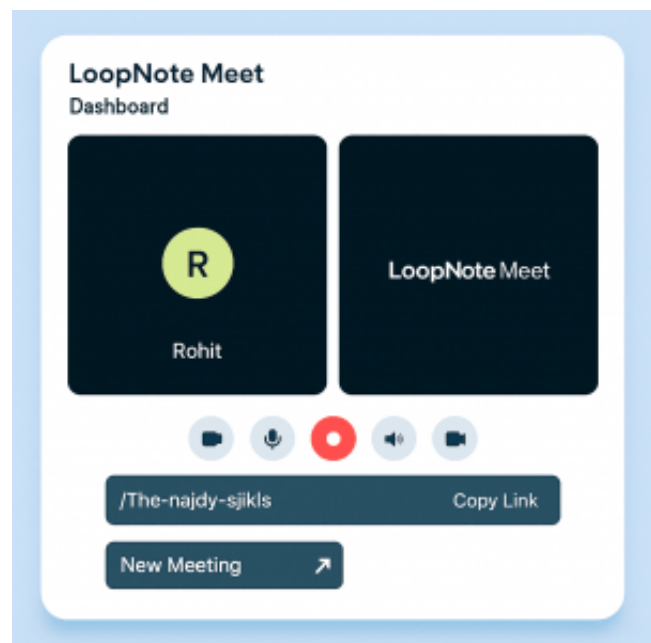

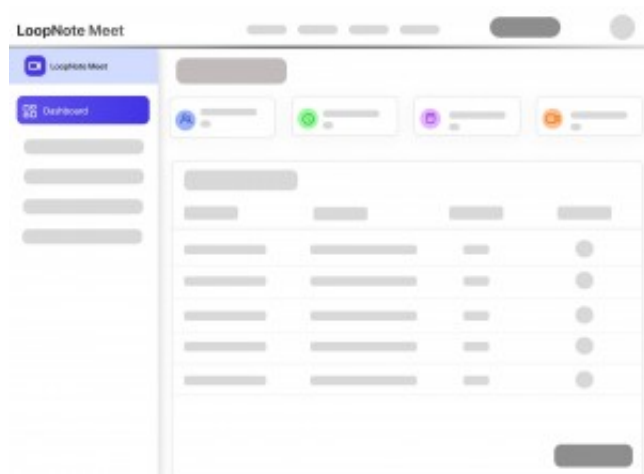

“People loved what Fireflies did, but many found it too bulky or expensive for their needs. LoopNote Meet is the fast, focused alternative,” said Rohit Ranjan, Founder of Tech Assistor Corporation.

Why Users Are Switching to [LoopNote Meet](https://loopnotemeet.com):

- No training needed — just plug in and go
- Clean summaries with key points & action items
- Seamless calendar & meeting integrations
- More affordable — Pro starts at \$9/month

Ideal for: VCs, Private Equity firms, Law Firms, remote-first startups, and solo professionals who spend hours in calls and want a smarter way to handle meeting follow-ups.

Try it now: <https://loopnotemeet.com>
