

Metalcorten Expands European Reach, Becoming a Leading Distributor of Corten Steel Products Across the Continent

Metalcorten in the UK, France, Portugal, Lithuania, Latvia, Poland, Sweden...

Pais Vasco, Spain Jul 29, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Metalcorten](#), a global specialist in Corten steel manufacturing and distribution, today announced a significant expansion of its distribution network, solidifying its position as a premier supplier of high-quality Corten steel products throughout Europe. This strategic move reinforces Metalcorten's commitment to meeting the growing demand for durable and aesthetically unique steel solutions in the industrial and architectural sectors.

With decades of expertise in the B2B industrial and manufacturing landscape, Metalcorten offers a comprehensive range of Corten steel products, including sheets, tear plates, coils, tubes, flat sheets, round smooth bars, angles, perforated plates, beams, and complementary products such as rust activators, protectors, and grinding discs. The company prides itself on delivering materials manufactured in Europe's best steel mills from recycled scrap, ensuring exceptional quality and the characteristic orange tone of copper/steel.

"Our expanded distribution across Europe marks a pivotal moment for Metalcorten," said a company

spokesperson. "We are now even better positioned to serve our industrial B2B clients with efficient delivery and access to our extensive stock of Corten steel products. Our aim is to simplify the procurement process for businesses seeking high-performance, weather-resistant steel for their diverse projects."

Metalcorten's robust distribution network now includes warehouses in Spain (Euskadi, Asturias, Galicia, Navarra, Com. Valenciana, Balearic Islands, Canary Islands, Andalusia, Catalonia), France, Slovakia, England, Belgium, and Portugal. This broad presence ensures timely and reliable delivery of essential materials for construction, infrastructure, and artistic applications across the continent.

The company's customer-centric approach to order fulfillment is streamlined and efficient:

- **Order Reception:** Orders are received via email, form, or phone call.
- **Customer Contact:** Metalcorten contacts the customer for order confirmation and product clarification.
- **Material Loading:** The material is loaded for its destination.
- **Material Arrival Confirmation:** The customer confirms that the material has arrived in good condition.

Metalcorten offers a wide array of Corten steel grades, including the original patented COR-TEN® (USS Steel), INDATEN S355J2WP, and HC 315WP, in various thicknesses and formats to meet precise project specifications. The company's commitment to innovation is also evident in its recent additions, such as the Corten Tear Plate for anti-slip exteriors and the introduction of UPN Corten steel beams to address increasing demand for profiles.

[About Metalcorten:](#)

Metalcorten is a leading manufacturer and distributor of Corten steel products, specializing in providing durable, high-quality, and aesthetically striking materials for industrial, architectural, and artistic applications.
