

MetaStock Australia Launches New XENITH for Daily Charts Global EOD Data Bundle at Special Introductory Price

MetaStock Australia is excited to unveil its latest data solution for end-of-day (EOD) traders: the **XENITH for Daily Charts Global Data Bundle**

Albion, Victoria Jul 5, 2025 ([IssueWire.com](https://www.issuewire.com)) - MetaStock Australia is excited to unveil its latest data solution for end-of-day (EOD) traders: the **XENITH for Daily Charts Global Data Bundle**(<https://www.metastockaustralia.com.au/product/global-equities-worldwide-futures-includes-forex-worldwide-indice/>), now available at a special price of **\$690 AUD** (originally \$729 AUD). This robust service offers unparalleled global market coverage with streaming **20-minute delayed updates**—all at an affordable price point.

Designed specifically for MetaStock DC users, the new **XENITH for Daily Charts** service provides:

- **Complete Equity market coverage** across Asia/Pacific, North/South America, and Europe
- **Comprehensive Futures, Commodities, and Forex data** across major regions
- **Access to nearly 3,000 international indices**
- **Historical data included** for thorough analysis and backtesting
- **Streaming 20-minute delayed updates** throughout the trading day

This data service is perfect for EOD traders seeking global market visibility without the higher costs associated with real-time data. With seamless MetaStock DC integration, users gain the benefits of broad data coverage, continuous chart updates, and in-depth historical reference—all in one cost-effective package.

“Our goal is to equip MetaStock users with the best tools and data, and the new XENITH for Daily Charts service is a major step forward,” said a spokesperson at MetaStock Australia. “It offers serious value for traders who want reliable, global insights updated throughout the day.”
