

Missing Interviews Cost Careers—JobSpeed's Smart Job Application Tracking Ensures You Never Miss Another Opportunity

Simple Enough to Start Today, Powerful Enough to Land Your Dream Job—No Spreadsheet Skills Required

The screenshot displays the JobSpeed application tracking system. On the left is a sidebar with a 'JOB SPEED' logo and navigation links: Applications, Calendar, Stats, Shared Applications, and Account. The main area shows a list of job applications. Each application card includes fields for Job Post, Company, Location, Status, Max Salary, Application Date, and Decision Date. The first application is for a Senior Java Developer at Kforce, with a status of 'Applied' and a max salary of \$125,000.00. The second application is for a Mid-Senior Java Developer at Kforce, with a status of 'Saved' and a max salary of \$115,000.00. The third application is for a Java API Developer at HDM, with a status of 'Applied' and a max salary of \$120,000.00. The fourth application is for a Lead Java Developer at MechTrain Inc., with a status of 'Applied' and a max salary of \$120,000.00. The interface also includes a search bar at the top right and a '9 found' indicator.

Richmond, Virginia Jul 21, 2025 (Issuewire.com) - Immersive Technologies LLC, a consultancy dedicated to making life easier through innovation, today announced the official launch of JobSpeed (<https://jobspeed.io>), a comprehensive application tracking system designed to streamline and modernize the job search experience.

Research reveals that over 50% of job seekers still rely on outdated spreadsheets to manage their applications, while 40% use scattered notes or have no tracking system at all. This inefficiency costs job seekers more than 5 hours per week in administrative overhead, with 32% missing critical interview opportunities due to poor organization.

"We recognized that while the job market had evolved dramatically, the tools available to job seekers remained painfully outdated," said Clint Dalton, Founder and CEO of Immersive Technologies. "JobSpeed represents our commitment to creating solutions that make a meaningful difference in people's professional journeys. What once required hours of weekly management can now be accomplished in minutes."

JobSpeed addresses the most common pain points in modern job searching through three core

features:

- **Intuitive Tracking System** – Replaces cumbersome spreadsheets with an elegant, purpose-built platform designed specifically for job seekers
- **Integrated Document Storage** – Centralizes resumes, cover letters, and application materials with easy access when needed
- **Calendar** – Built-in calendar ensures users never miss interviews or follow-up opportunities

Additional features include comprehensive notes and contact management, application statistics and insights, and a unique job-sharing capability where users can discover opportunities shared by fellow job seekers.

"JobSpeed isn't just an app—it's peace of mind during the stress of finding work," reports Sarah G., a claims analyst and early adopter of the platform.

The platform is available now for \$24.95 for four months of access—approximately \$6 per month—making professional job search organization accessible to everyone. New users can experience JobSpeed risk-free with a 10-day trial that allows tracking of up to 20 applications without requiring a credit card.

Immersive Technologies is also launching an affiliate program offering 20% commission to career coaches, bloggers, and influencers interested in helping job seekers discover more efficient application management.

About Immersive Technologies LLC

Founded in 2017, Immersive Technologies LLC combines expertise in software development, user experience design, and firsthand knowledge of modern job search challenges. The company's approach integrates technical excellence with human-centered design to ensure innovations are not just technically sound but genuinely useful. Learn more at immersion.company.
