Never miss your flights when you have the support of DigiYatra and Assure Cab outstation cabs

Mumbai, Maharashtra Jul 20, 2025 ([IssueWire.com](https://www.issuewire.com)) - Never miss your flights when you have the support of DigiYatra and Assure Cab

An industry-led program called DigiYatra employs face recognition technology to streamline, simplify, and eliminate paper-based processes for terminal access and security clearance at airports. To validate fliers' identities, the site employs face recognition technology. DigiYatra is a mobile-based decentralized ID storage platform where air travelers may preserve their identification and travel documents.

This platform, created by the Ministry of Civil Aviation (MOCA) and the DigiYatra Foundation, is an additional step towards developing a digitally educated society. DigiYatra, the next generation of air travel, enables the autonomous digital processing of passengers. The DigiYatra technology provided by Delhi Airport benefits flying travelers by reducing wait time and making the boarding procedure faster and more fluid.

DigiYatra enables paperless travel by air and assists flyers in navigating airport operations with minimal physical interaction. It uses modern biometric security systems, allowing travelers to stroll through the cameras quickly. DigiYatra is based on four pillars: connected flying, connected passengers, connected airports, and connected systems, with simple entrances at all checkpoints.

Like DigiYatra is making your one-city-to-another-city travel seamless, Assure Cab can be your partner in reaching the Airport. Whether traveling one way or intercity, book Assure Cab in advance to get to the Airport on time and never miss your [flight. to](#) book a cab use <https://www.assurecab.com/> **All india all airport service cab for outstation one way ,round trip.in 2000 city.**

[Assure Cab](#) are stepping a fast foot forward in the cab rental industry. They believe in reliability and being on-time. The main factor they assure you of is- 'Never Miss your flight'. They are making road travel seamless and hassle-free. Whether you are travelling outstation or intercity, reaching on or before time is the major concern. For instance, consider you have to travel from one city to another to catch a flight, and you are worried about the cab availability. Now you don't really have to stress about it. Just <https://www.assurecab.com/> on your Android Smartphone and get going with it. Assure Cab is just not restricted to any specific city or district but the services are spread across India.

Let's look deeper into the process of how DigiYatra works-

How do you use it once you reach the Airport?

Step 1- Departure Entry DigiYatra

- Scan your boarding pass at the DigiYatra E-Gate.
- Look at the camera and get your face scanned.
- The E-Gate will open, allowing you to access the Terminal.

Step 2- DigiYatra Pre Security E-Gate

- At the security checkpoint, proceed to the DigiYatra E-Gate.
- Examine the DigiYatra E-Gate's camera.
- Following authentication, the E-Gate will open; move on to your boarding gate.

Step 3- At the Boarding Gate

- When your flight begins boarding,
- Examine the Biometric Camera at the Boarding Gate
- After your system has been validated, go to the aircraft.

To End it all-

Digi Yatra is a new method designed by the Indian government to make air travel smoother, simpler, and more comfortable. Instead of needing to present your ticket and ID at several airport checkpoints, you can just register your information on the Digi Yatra website and then utilize your face as your boarding pass. Before leaving for the Airport, you must register with the app using your boarding pass, Aadhar card, and facial scan. At certain stages, the data will be exchanged with all DigiYatra outlets.

Digi Yatra, in essence, employs facial recognition software to recognize you as you travel through the Airport. You no longer need to repeatedly exhibit your documents, which speeds up and improves efficiency. To reach the Airport on time, book your Cab with Assure Cab in advance, which never lets you miss your flight. Being your travel partner, it aims to give you a seamless and hassle-free experience.

Facts to remember–

- The DigiYatra face recognition software makes it easier to navigate airports.
- Scindia affirmed that no personal information about travelers is held in a central repository or by the Digi Yatra Foundation.
- According to the government, data recorded in the Airport's system is destroyed within 24 hours after the flight's departure.
