TRANSPARENT

Great Neck, New York Jul 1, 2025 ([IssueWire.com](https://www.issuewire.com)) - [Onyx Coating](#), a global innovator in automotive surface protection, proudly announces the forthcoming launch of [Graphene Pure Ultra](#), a next-generation graphene-infused ceramic coating designed exclusively for professional car detailers and automotive protection experts worldwide.

Revolutionary 10H Hardness Meets N1 Smoothness

Graphene Pure Ultra sets a new benchmark in surface protection technology. It delivers certified 10H hardness—the industry’s top level for scratch resistance—and achieves N1 smoothness, the smoothest grade achievable in surface roughness standards. This unrivaled combination ensures ultra-low friction, minimizes dirt adhesion, and makes maintenance effortless.

Engineered with Graphene Nanotube Synergy: What Is Onyx Graphene Pure Ultra?

At its core, Onyx Graphene Pure Ultra is a high-performance, chemical-based automotive ceramic coating engineered to deliver unrivaled durability, gloss, and slickness. It’s a clear liquid formulated with cutting-edge ingredients, including:

- 1,1'-Oxybisbutane; Dibutyl Ether – improves application fluidity.
- Distillates (petroleum), hydrotreated light – enhances bonding strength
- 2-Propanol – ensures rapid drying
- Polyoxyethylene monooleyl ether – for optimal surface coverage
- Phenyltrimethoxysilane – offers exceptional chemical resistance
- Multi-walled carbon nanotubes (MWCNTs) – for graphene-based performance

This powerful blend doesn’t just look good on paper. It’s been formulated for real-world conditions — to endure the toughest environments, enhance surface properties, and significantly extend the lifespan of the vehicle’s finish.

Stunning Showroom Gloss and Depth

Graphene Pure Ultra bonds chemically with your vehicle’s clear coat, creating a permanent, ultra-slick layer that reflects light with breathtaking clarity. This deep gloss effect enhances vehicle aesthetics and preserves finish quality over time.

Tailored for Professionals, Backed by Certification

Developed for certified detailers and high-end auto salons, Graphene Pure Ultra is not available for general consumers. Onyx Coating will support its rollout with comprehensive [Onyx Coating Certified Installer Program](#), expert installation guidance, marketing resources, and priority product access for certified professionals.

Global Availability via Certified Channels

Pre-orders for Graphene Pure Ultra open this summer, with official release across select global markets—including the GCC—planned in the coming months. Initial supply will be limited to ensure consistent performance quality.
