Sydney, New South Wales Jul 25, 2025 (Issuewire.com) - Opera Solar Energy, a trusted provider of renewable energy solutions in Sydney, has unveiled a new **solar battery rebate program** to help households across New South Wales access **affordable solar battery storage** with ease.

As energy bills rise and more families seek greater independence from the grid, demand for solar

energy continues to soar. Yet for many homeowners, the **cost of solar batteries** has remained a significant hurdle—until now. Opera Solar Energy’s latest initiative bridges that gap, offering a **cheaper solar battery solution** that’s both accessible and reliable.

“Every Australian household deserves access to clean, reliable, and affordable energy,” said a spokesperson for Opera Solar Energy. “Our [solar battery rebate in Sydney](#) lowers upfront costs and empowers more families to adopt **solar-plus-storage systems** without financial pressure.”

The rebate is available to eligible homeowners installing **CEC-approved** solar battery systems alongside new or existing rooftop solar panels. Opera Solar Energy also helps customers navigate **government-backed rebate programs** and maximise savings through **free solar estimates**, consultations, and personalised recommendations.

With a reputation for quality and service, Opera installs premium lithium battery systems compatible with top inverter brands. Whether you need backup during outages, off-grid capability, or better control over your energy usage, their battery solutions deliver long-term savings and peace of mind.

Backed by a team of local experts, Opera Solar Energy simplifies the journey—from consultation to final **solar battery installation**—with full transparency, flexible financing options, and end-to-end support.

For more details on **solar battery cost**, eligibility, and product options, contact Opera Solar Energy.

About Opera Solar Energy

Founded in 2018, Opera Solar Energy is a leading solar energy company based in Sydney. The company specialises in **solar panel installations**, **solar battery storage**, and end-to-end energy consultation services for homes and businesses across NSW. Opera’s team of **CEC-certified installers** ensures every system meets the highest standards of performance, compliance, and safety.

The advertisement is split into two panels. The left panel has an orange background and features the Opera Solar Energy logo at the top. It describes a 12.54kW solar system installed for a large Sydney home, highlighting 34 Trina panels and a 10kW Fronius inverter. It claims strong performance and a 4-5 year return on investment. The right panel has a blue background and promotes 'Cheaper Solar Battery Storage for Small Businesses' as 'A Smart Investment'. It shows a white battery unit with a warning symbol and a green checkmark icon. Both panels include contact information: 'More information call us 1300 271 430' and 'www.operasolar.com.au VISIT OUR WEBSITE'. The right panel also includes the text 'Get a free solar estimate'.

Opera Solar Energy

For this large Sydney home, we installed a 12.54kW solar system featuring **34 Trina panels and a 10kW Fronius inverter.** It's one of our most trusted combinations—delivering strong performance and a return on investment in just 4-5 years.
