

PastWipe Launches Confidential Mugshot Removal Service to Help Individuals Reclaim Their Digital Reputation

AI-powered reputation management platform empowers users to move forward from past mistakes by removing harmful online mugshots

London, United Kingdom Jul 22, 2025 ([IssueWire.com](https://www.issuewire.com)) - *PastWipe*, a digital reputation management platform specializing in AI-driven content removal, today announced the official launch of its **Mugshot Removal Service** — a discreet, results-oriented solution that gives individuals a second chance by eliminating damaging mugshot images and related arrest records from the internet.

The internet never forgets — but PastWipe believes people deserve the right to move on. In an era where a single search result can destroy job prospects, relationships, or personal safety, PastWipe’s team of reputation specialists and legal researchers work behind the scenes to remove mugshots from search engines, data broker sites, police report aggregators, and social media platforms.

“We are not in the business of judging people. We are in the business of helping them move forward,” said **Ralph Ehlers**, founder and CEO of PastWipe. “A mugshot from the past should not define someone’s future — especially when the legal matter is resolved, dropped, or outdated.”

A Fast, Ethical, and Discreet Approach

PastWipe's Mugshot Removal Service uses **advanced AI analysis, legal takedown protocols**, and **direct data broker negotiations** to eliminate mugshot images from over 70 known offender-hosting websites and Google search results. In many cases, removals are completed in as little as **7–14 business days**.

- 100% confidential service
- Flat-fee pricing with no hidden costs
- Free digital reputation scan before engagement
- Full removal reports and follow-up verification

Unlike shady “pay-to-remove” networks, PastWipe does **not** host mugshot data nor engage in extortion-based practices. All removals are handled through compliant takedown procedures based on privacy rights, expired record laws, and data protection legislation, including **GDPR, California Consumer Privacy Act**, and more.

Who Is This For?

This service is ideal for:

- Individuals seeking employment or housing
- Professionals undergoing background checks
- Anyone wishing to protect their family, children, or brand

As part of its mission, PastWipe is offering a **free mugshot check and privacy consultation** to anyone concerned about their online presence. Interested users can start their scan at www.pastwipe.com — no payment required.

About PastWipe

PastWipe is an AI-powered reputation management service that helps individuals and businesses remove unwanted online content, including outdated posts, harmful articles, personal data leaks, and now — mugshots. With clients in over 20 countries, PastWipe is trusted by professionals, public figures, and everyday users looking to reclaim control over their digital identity.
