

PerfectARC Launches on Indiegogo to Revolutionize Basketball Shooting with Precision Tech

A performance-based shooting system designed for athletes of all levels, PerfectARC delivers real-time feedback to master arc, alignment, and repeatability.

West Palm Beach, Florida Jul 16, 2025 ([IssueWire.com](https://www.issuewire.com)) - PerfectARC Revolutionizes Basketball Training with a Data-Driven Shooting System

In a game where milliseconds and millimeters make the difference, *PerfectARC* is redefining how athletes train to shoot with precision. The innovative new basketball training system brings real-time feedback and science-backed metrics to the court, helping players of all ages and skill levels improve form, rhythm, and shooting arc, with repeatable results.

Developed by sports tech entrepreneur **Steve Steinberger**, PerfectARC combines physics, sensor data, and visual alignment tools into a lightweight system that tracks shot mechanics from release to rim. Designed for use at home, in gyms, and training centers, PerfectARC replaces guesswork with precision.

“Our goal is simple,” said Steinberger, founder of PerfectARC. “We want to give every athlete — from youth players to pros — the tools to shoot with consistent form and confidence. This is about unlocking potential through repeatable, measurable training.”

Currently live on **Indiegogo**, the crowdfunding campaign offers early backers exclusive discounts, bundled systems, and opportunities to be featured on the company’s Hall of Champions.

Key Features:

- **Real-time feedback** on arc, alignment, and form
- **Visual training gates** to reinforce perfect mechanics

- **Portable setup** for home or gym use
- **Designed for all ages and skill levels**

PerfectARC is poised to enter AAU programs, high school gyms, and even pro training facilities. As performance technology expands in sports, PerfectARC stands out by merging affordability with elite-level insight.
