

Pro Analyser Launches GST Analyser to Help NBFCs Automate Compliance and Credit Evaluation

Pro Analyser's GST Analyser automates GSTR-1, 3B, and 9 analysis, identifies compliance issues, tracks tax trends, and enables NBFCs, DSAs, auditors, and CAs to make faster, data-driven credit decisions with real-time financial insights.

Coimbatore, Tamil Nadu Jul 25, 2025 ([Issuewire.com](https://www.issuewire.com)) - **Pro Analyser**, a fintech platform empowering India's lending ecosystem, has launched its **GST Analyser**, a robust tool designed to help NBFCs, DSAs, auditors, and CAs assess borrower compliance through real-time GST data intelligence.

The tool automatically analyses key return filings including **GSTR-1**, **GSTR-3B**, and **GSTR-2B**, enabling users to:

- Evaluate sales vs tax liability trends
- Track filing frequency and consistency
- Validate **Input Tax Credit (ITC)** claims accurately
- Detect mismatches between reported sales and purchases
- Flag high-risk behavior patterns before loan disbursal

Unlike manual review methods or surface-level credit scores, this analyser provides a **data-backed, 360° view of borrower compliance**, helping lenders underwrite smarter, faster, and with confidence.

“With GSTR 2B and ITC validation, our tool gives lenders clarity on what's claimed, what's eligible, and what's risky,” said **Riyas Babu M**, SEO Specialist at Pro Analyser. “It's a must-have for digital-first credit teams.”

Users have reported faster processing cycles, improved fraud checks, and better borrower profiling—all from one smart dashboard.
