# ProxiesThatWork.com Launches — Cutting Through the Noise with Simple, Affordable, Functional Proxies

A new proxy service just launched, offering $0.02 per IP!

Albuquerque, New Mexico Jul 10, 2025 (Issuewire.com**)** - After years of watching proxy services overcomplicate a simple need, the team behind *ProxiesThatWork.com* is proud to announce the official launch of a new kind of proxy platform: one that delivers what actually matters: **affordable pricing, radical simplicity, and proven functionality**.

No fluff. Just **working proxies,** you can start using in seconds.

In a market that seems designed to confuse, *ProxiesThatWork.com* offers a rare alternative: a product built by people who were tired of unreliable IPs, clunky interfaces, and overpriced plans that promise everything but deliver very little.

The Vision: Make Proxies Work for People Again

"Most of the proxy space is built for margins, not users," says **Naomi Dee**, Head of Product at ProxiesThatWork.com. "Pricing is inflated. Onboarding is a maze. And support is usually non-existent. We wanted to strip all that away and build something refreshingly honest — proxies that work, at a price that makes sense."

What started as a side project became a fully operational service after three years of testing, rebuilding, and learning from real-world failures across the industry. The result is a fast, affordable, and reliable platform that caters to developers, scrapers, automation testers, and technical users who don't want to waste time or money.

Here's What Makes ProxiesThatWork.com Different

1. Affordable Pricing — 150 Proxies for $3/Month

At $0.02 per proxy, *ProxiesThatWork.com* currently offers the lowest pricing in the industry:

- **150 IPs for $3/month**

- **1,000 IPs for $20/month**

- **2,500 IPs for $50/month**

This flat, transparent model is designed for users who need scale **without getting hit by hidden limits or surprise fees**.

2. Simplicity at Every Step

From sign-up to setup, everything is designed to be frictionless:

- No setup fees

- No sales calls

- No bloated dashboard

Just pick your plan, authenticate your IP, and start using your proxies — all within minutes.

ProxiesThatWork.com also includes:

- Built-in IP authentication

- Instant provisioning

- A clean, distraction-free UI

Perfect for those who've had enough of "enterprise proxy dashboards" and just want something that works.

3. Publicly Verified Proxy Compatibility

Most proxy providers expect you to *hope* their IPs will work where you need them. ProxiesThatWork.com does the opposite — it **tests every proxy every five minutes** against the top 1,000 websites and publishes the results publicly.

This level of real-time transparency is rare — and it's core to the brand's belief in earning user trust.

"You shouldn't have to wonder if your proxies will work. You should know," Naomi adds. "That's why we built live testing into the product itself."

Built by Users, Not Sales Teams

Unlike traditional providers, *ProxiesThatWork.com* wasn't founded by marketers — it was built by a team of devs and automation specialists who've struggled through all the same issues customers face today.

They've dealt with:

- Proxies that stop working randomly

- Overly complex configuration flows

- Being upsold on IP types they didn't need

- Poor customer support and unclear documentation

That experience became the foundation for a different kind of product — one that respects the user's time and budget.

An Answer to the Overbuilt, Overpriced Market

ProxiesThatWork.com is ideal for anyone who values clarity over complexity. While most proxy platforms try to dazzle users with buzzwords, this launch is a return to basics: working proxies, affordable pricing, and fast, transparent access.

The platform is intentionally lean. It doesn't promise to solve every edge case — instead, it delivers **a dependable foundation** users can trust.

If you've ever felt overwhelmed trying to choose a proxy provider, this service was built for you.

Start Free. Cancel Anytime. No Commitments.

ProxiesThatWork.com is now officially open to the public. Every plan is backed by a **7-day guarantee** with **no long-term commitments**. Cancel anytime, no hassle. A **limited number of free Proxy Trial Plans** are available for early users — first come, first served.

Start with a Proxy Trial Plan and experience the difference.
