

QuickMove Technologies Launches Next-Generation Freight Forwarding Software To Digitally Transform Global Logistics

The image displays the QuickMove Freight Forwarding Software interface. At the top right is the Quickmove logo with the tagline "Technology Simplifies Business". The main heading is "FREIGHT FORWARDING SOFTWARE". Below this, there are ten feature boxes arranged in three rows. The first row includes: "Quotation & Rate Management" (Contract, Pricing for Sea, Air, and Land), "Job Creation & Booking Flow" (Multi-mode shipment jobs with full operational lifecycle), and "Master & House BL Management" (For both Freight Forwarding and NVOCC operations). The second row includes: "Billing & Invoicing Automation" (Customer/vendor billing, debit/credit note, deposit reconciliation), "Shipment & Milestone Tracking" (Real-time updates with GPS/Telematics integration), and "Manifest & Documentation Automation" (Arrival notice, Delivery order, Certificate generation). The third row includes: "Customer & Agent Portal" (Self-service for documents, tracking, and communication), "Profitability & Cost Analysis" (Job-wise margin, container cost tracking, and P&L visibility), and "Warehouse & Transit Billing (Optional)" (For bonded/transit storage operations). A fourth row at the bottom includes: "Mobile App Support" (For field operations, driver updates, POD) and "Container Management (NVOCC)" (Container master, slot booking, damage tracking, and deposit handling). The background of the interface shows a laptop displaying the software, with a cargo ship, a truck, and a cargo plane in the background, along with gears and a sun icon.

Bengaluru, Karnataka Jul 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - QuickMove Technologies, a leading logistics software provider, has announced the launch of its advanced [Freight Management Software](#), a cloud-based, scalable solution designed to streamline operations for freight forwarders, customs brokers, NVOCCs, and international logistics providers.

As the logistics industry rapidly embraces digital transformation, QuickMove's **cloud-based freight forwarding solution** empowers freight forwarders with smart automation, integrated modules, and real-time data access — all from a single platform. The software offers modules for **shipment tracking, automated billing & invoicing, profitability analysis, customs documentation, and CRM for freight forwarders.**

“We developed this solution to empower freight forwarders with tools that improve efficiency, profitability, and visibility,” said **Gopalakrishna Pillai K, CEO of QuickMove Technologies.** “Our goal is to enable freight businesses—especially small and mid-sized logistics companies to compete on a global scale with best-in-class digital infrastructure.”

Key Features of QuickMove [Freight Software](#):

- **Quotation & Rate Management** for air, sea, and road shipments.
- **Multi-currency and Multi-Country** support to manage global transactions.
- **Job Booking & Shipment Handling** with integrated milestone tracking.

- **Complete Digitalization, Manifest, and other Documentation** for compliance and faster clearances.
- **E-invoicing and Billing Automation** to reduce delays and errors.
- **Profitability & Cost Analysis** for Smarter Decision-Making.
- **Container Management (NVOCC Software)** with real-time updates.
- **Advanced Reporting and Analytics** with customizable dashboards.
- **Automation for faster growth**, team efficiency, Quality Service & end customer Satisfaction.
- **Knowledge base support** for all documents, email, and SMS improves 42% team efficiency and quality.
- **Work Flows** insist on process and boost quality and growth.

QuickMove's [freight forwarding software](#) is designed for cloud-based deployment, ensuring 24/7 access from any location, consisting of CRM, ERP, Billing, Accounts, Procurement, HR, payroll, and tracking shipments.

Our Freight Forwarding Software is hosted on a secure, scalable cloud infrastructure, ensuring **high availability and data security**, which is critical for freight companies handling cross-border transactions.

With increasing global demand for **digital freight management** and **supply chain automation**, QuickMove provides an agile solution for companies seeking to transition from spreadsheets and legacy tools to advanced logistics technology.

About QuickMove Technologies

Founded in 2009, QuickMove Technologies is a Bangalore-based logistics technology company offering specialized **logistics software** solutions for **Freight Forwarding, Packers and Movers, Transport Management**, and **Warehousing companies**. With customers across Asia, Europe, and the Middle East, QuickMove is committed to transforming logistics with scalable, efficient, and user-friendly logistics software.

Logistics businesses can now [start a free trial](#), explore the platform's capabilities, and go live in just a few days without complex setups.
