

Rink Systems Supplies Skate Sharpening Machines to Support Ice Rink Operations

The firm offers skate sharpening machines and related accessories to support the maintenance and operation of ice rinks.

Albert Lea, Minnesota Jul 11, 2025 ([Issuewire.com](https://www.issuewire.com)) - Rink Systems supplies equipment and accessories for ice rink operations, including skate sharpening machines and related components. These products are used in the maintenance of hockey, figure, goalie, and recreational skates, assisting rink operators and skate technicians in maintaining consistent blade performance.

The representative for Rink Systems stated, “Our skate sharpening accessories support all makes and models, aiding the maintenance of skate blades and equipment.”

Rink Systems supplies skate sharpening machines designed for a broad range of skate types. These machines are accompanied by a selection of accessories intended to support the functioning and maintenance of sharpening equipment. The product range includes grinding wheels, diamond dressers, wear pads, lube sticks, hand hones, skate holders, and vacuum systems to collect steel dust generated during sharpening.

[Skate sharpening machines](#) serve an important role in the ice skating industry, providing precision sharpening necessary for safe and effective skating. The grinding wheels offered by Rink Systems are available in various grits and sizes to meet the requirements of different skate blades. Diamond dressers are used to maintain the flatness and sharpness of grinding wheels, a step that helps ensure consistent edge sharpening. Wear pads to protect skate holders and maintain alignment during sharpening, contributing to accurate results.

In addition, vacuum systems and filters are used to manage steel dust, reducing airborne particulates in the workspace and supporting equipment longevity. Skate holders secure skates during sharpening to ensure precise and uniform blade edges.

The representative added, “Our products are compatible with skate sharpening machines such as ProSharp, Sparx, Wissota, BladeMaster, and Cag One. This compatibility supports rink operators in maintaining consistent skate sharpening results.”

Rink Systems supplies skate sharpening machines and accessories designed to support compatibility, operational consistency, and maintenance requirements across various ice rink environments.

About Rink Systems
