

Rodan Energy Acquires MEI Energy Solutions

Expands Grid-Edge Capabilities and Energy Optimization Platform

Mississauga, Ontario Jul 21, 2025 ([Issuewire.com](https://www.issuewire.com)) - Rodan Energy Solutions, a North American leader in grid optimization and distributed energy solutions, has acquired MEI Energy Solutions Ltd., a respected provider of project management, supply and installation of electrical systems for power producers, utilities and large industrial/commercial clients. This deal significantly enhances Rodan Energy's ability to deliver large-scale Advanced Metering Infrastructure (AMI) deployments and expands its engineering, assembly, programming, installation, and maintenance capabilities for advanced metering, SCADA, and other grid-edge technologies across North America.

This strategic move strengthens Rodan Energy's position as a full-spectrum provider of grid-edge infrastructure and energy asset optimization solutions for utilities, power producers, and large energy users across North America. The integration of MEI's capabilities supports Rodan Energy's growing portfolio of services, including the design, build, ownership, and operation of battery energy storage systems (BESS), solar, EV charging and microgrids—critical components of a modern, resilient, and decarbonized power grid.

"With MEI joining the Rodan Energy platform, we're accelerating our ability to deliver turnkey grid-edge solutions that support the optimization of both load and generation assets," said Paul Grod, Founder and CEO of Rodan Energy. "This acquisition enhances our ability to serve utilities, power producers, and large energy users with integrated solutions that combine advanced metering, SCADA, and DER technologies with our industry-leading capabilities in dispatch, settlement, and energy market participation."

Neil Brown, former President of MEI Energy Solutions and now Special Projects Coordinator at Rodan Energy, added, "We are excited to join the Rodan team and bring our expertise onboard to help strengthen their strategic position in North American energy markets."

The acquisition also deepens Rodan Energy's ability to support our clients across North America and reinforces its commitment to delivering reliable, client-focused energy solutions. Clients can expect a seamless transition and continued excellence in service delivery, regulatory compliance, and operational

performance.

About Rodan Energy Solutions

We Make Sustainable, Attainable™ by enabling our customers to optimize their energy resources, sustainability goals, and power reliability. Rodan Energy develops and optimizes energy resources connected to the power grid for producers, large users, and distributors of electricity. For over 20 years, Rodan Energy has been delivering valuable solutions to our clients, including Distributed Energy Resources (DER) Solutions, Demand Response Solutions (DRS), Energy Intelligence Solutions (EIS), and Power System Solutions (PSS).
