

Sendwishonline.com Unveils New Photo Card and Invitation Features to Revolutionize Group Greeting Cards

Celebrate birthdays, farewells, anniversaries, and more with personalized digital group cards enhanced by photos, GIFs, slideshows, and wishboards.

Montreal, Quebec Jul 11, 2025 (Issuewire.com) - In the age of hybrid teams and global connections, meaningful celebration shouldn't be limited by distance. Sendwishonline is redefining how we celebrate together with a new suite of features, enhancing the way users create **group greeting cards** for every occasion.

From heartfelt group cards to event-ready invitation templates, the platform now lets users add **photo cards** — a newly launched feature where you can customize a card with editable text, names (like the birthday person's name), and personal messages. These additions bring more emotion and creativity into [free birthday cards](#), anniversary cards, farewell cards, and more.

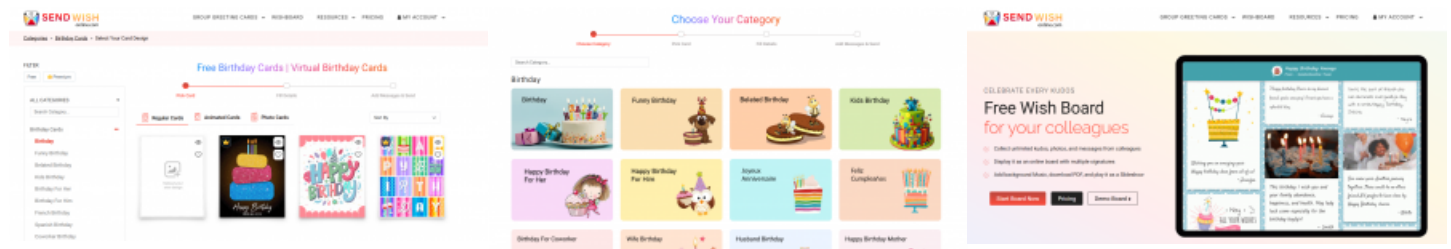

Whether it's a work anniversary group card or a goodbye message for a colleague, Sendwishonline makes it easy to invite others via **QR code sharing**, email, or link. No account is needed to sign, though sending or creating a card requires a quick sign-up — allowing better control, collaboration, and privacy.

The platform combines the functionality of three powerful tools:

- **Group cards** with messages, photos, GIFs, and slideshows
- A **Wishboard** as a Kudoboard alternative, letting teammates share group messages on a single board
- Custom invitations for birthdays, weddings, and workplace events

Recent updates also include downloadable PDF cards, embedded YouTube or TikTok links, and a slideshow view for everyone's wishes. It's perfect for corporate teams, classrooms, friend groups, or family gatherings.

Make your next celebration truly memorable with Sendwishonline — the one-stop solution for [free group greeting cards](#) and creative digital invites.
