

Shamayev Business Law enhances its service with a client onboarding function

Shamayev Business Law (SBL), a U.S. law corporation with ten years of history and over 3,400 approved cases, has complemented its immigration services with a client onboarding function.

Hollywood, Florida Jul 14, 2025 ([IssueWire.com](https://www.issuewire.com)) - Immigration history is made up of details

Immigration to the United States is a path that a client takes only once, with neither prior experience nor expertise in immigration as such. For this part of the client's life journey, the SBL team steps in to bring its legal competence and guidance, helping to foresee possible obstacles and prevent them through a structured and comprehensive approach to information filing and evidence.

The client's onboarding service is designed to reduce the risks of prolonging the contract and, as a result, increasing the cost of immigration due to the following reasons:

- The client cannot always estimate correctly the time needed to collect documents;
- The information provided sometimes requires further clarification;
- Incomplete information or insufficient proof materials might require additional time to provide those missing details.

Integrating the client into the legal project

Onboarding is a detailed plan for engaging the client in a legal partnership with a standard duration of 6 months. It allows for the smooth and timely provision of information to build a compelling evidence base. Improving the mechanism for working with clients reduces the risk of delaying case preparation.

Client onboarding is now part of SBL's immigration offer and can be accessed as soon as the agreement is signed.

The client's most significant involvement in the project is required during the first month of case development. To facilitate document collection, we have carefully structured all stages of the process, which now includes ready-made tables and templates, to be completed within the specified timeframe. Client onboarding is only the first step in improving the corporate standard of work with the client and the first stage of process automation at SBL corporation.

Adherence to deadlines, agreement, and strategy are core elements of Shamayev Business Law practice. A complimentary client onboarding service makes our working routine even easier, allowing for a more transparent and clear vision of the immigration path.
