

Smarter Lid, Sleeker Design: The Quencher H2.O Just Got an Upgrade

Stay refreshed with Stanley's newest updates—designed for comfort, style, and sustainability.

Lagos, Nigeria Jul 30, 2025 ([IssueWire.com](https://www.IssueWire.com)) - Elevated Hydration with Modern Innovation

Stanley, a trusted name in durable drinkware and hydration solutions for over a century, proudly announces the latest enhancements to its highly sought-after Quencher H2.O FlowState™ Tumbler—20 oz. Designed with both function and fashion in mind, the refreshed tumbler elevates everyday hydration for on-the-go lifestyles.

Now available in a sleek new Powder Soft Lilac colorway (pictured below), this 20 oz tumbler combines trend-forward aesthetics with user-focused innovations.

What's New in the Quencher H2O:

Upgraded FlowState™ Lid Technology

The new 3-position FlowState™ lid features enhanced leak resistance and a smoother rotation mechanism. The lid now offers a better-sealed straw position, rotating cover, and fully closed option to keep your beverage safe and spill-free in more dynamic environments.

Refined Ergonomic Design

The re-engineered silhouette includes a more contoured grip, providing improved comfort during long commutes, workouts, or workdays. The base remains cupholder-friendly, ensuring seamless portability.

Eco-Friendly and BPA-Free Materials

Staying true to Stanley's sustainability commitment, the tumbler is crafted with 90% recycled stainless steel and fully BPA-free materials, promoting both personal and environmental wellness.

Double-Wall Vacuum Insulation

Keeps drinks cold for up to 9 hours or iced for 35+ hours—perfect for hot climates or all-day use.

Dishwasher Safe for Easy Cleaning

Built for real life, the Quencher H2.O now features a more durable coating and an updated base seal for even better dishwasher compatibility.

“Our goal with this update was to refine what our customers already loved,” said a Stanley Nigeria spokesperson. “We’ve elevated the features that matter most—comfort, sustainability, and style—without compromising on the legendary durability Stanley is known for.”

Whether you're heading to the gym, the office, or just out for errands, the Quencher H2.O FlowState™ Tumbler – 20 oz delivers hydration that fits your rhythm and your look.

About Stanley:

For over 100 years, Stanley has been the leader in durable, high-performance drinkware, combining innovative engineering with timeless design. The brand continues to serve those who seek quality, sustainability, and reliability in every sip.
