

Tenxer Labs Strengthens its Board of Directors with the Appointment of Chris Alexandre

Welcoming Chris Alexandre

Joining the Tenxer Labs Board of Directors

Bringing over 20 years of global semiconductor leadership to guide our next phase of ecosystem innovation.

Former – Senior VP and GM at Renesas |
Ex – NXP, Fairchild, Texas Instruments

San Francisco, California Jul 8, 2025 (Issuewire.com) - Tenxer Labs, a company dedicated to fostering innovation across the global electronics ecosystem, today announced the appointment of Chris Alexandre to its Board of Directors. Mr. Alexandre, a respected leader with over two decades of experience steering global strategy in the semiconductor sector, will provide crucial guidance as Tenxer Labs expands its efforts to solve systemic challenges in the hardware development lifecycle.

Mr. Alexandre, who previously served as a strategic advisor, brings a wealth of experience from senior roles at Renesas, NXP, and Texas Instruments. His appointment signifies a deepening commitment by Tenxer Labs to bridge the gap between semiconductor innovators and system designers, accelerating the adoption of new technologies across the industry.

“Chris joins us at a critical inflection point for the semiconductor industry,” said **Sridhar Joshi**, Co-Founder and CEO of Tenxer Labs. “As chip complexity skyrockets and time-to-market pressures intensify, the traditional models for hardware evaluation and co-development are no longer sustainable. Chris’s profound understanding of these ecosystem-wide challenges and his experience in scaling global operations will be instrumental. His leadership on our board will help us advance our mission to create a more connected and efficient innovation ecosystem for the entire electronics value chain.”

The global electronics industry is grappling with increasing fragmentation and complexity. As advancements in AI, IoT, and automotive technology accelerate, the process of bringing a new semiconductor from design to deployment has become fraught with delays and inefficiencies. Tenxer Labs is addressing this challenge by fostering seamless, real-time collaboration between component suppliers and system integrators.

Chris Alexandre said, “Tenxer Labs has a bold vision to modernize and build the digital infrastructure needed for the next wave of electronic innovation. I am happy to join the board of a company that is at the forefront of solving fundamental challenges within the electronics value chain.”

Mr. Alexandre most recently served as Senior Vice President and General Manager of Power at Renesas Electronics. Prior to that, he was the company's Chief Sales & Marketing Officer. His career includes numerous senior leadership roles, including SVP of Worldwide Sales at NXP, SVP of Global Sales and Marketing at IDT, and various leadership positions at Fairchild and Texas Instruments. He holds a Master of Science in Electrical Engineering from ISEN (Institut Supérieur de l'Électronique et du Numérique) in France.

About Tenxer Labs:

Tenxer Labs is a technology company dedicated to accelerating innovation across the global electronics industry. By developing new digital frameworks and platforms, Tenxer Labs dismantles the traditional barriers in the hardware development cycle. The company’s solutions foster seamless, real-time collaboration between semiconductor companies and system designers, creating a more agile, efficient, and connected ecosystem for bringing next-generation electronics to market.
