Born in **Temple, Texas**, Yungllucid started making music in **2023** as a way to process his emotions and confront the realities of life that most try to ignore. “**Nobody really listens when you speak on pain,**” he shares. “**So I decided to turn mine into music.**”

“**Emotional LIGHTS**” is more than an album—it’s a cry for understanding and a bold declaration of independence. With tracks that blend heartbreak, anxiety, isolation, and ambition, Yungllucid is crafting a lane all his own in a crowded hip-hop landscape.

Raw. Real. Relatable.

What sets “**Emotional LIGHTS**” apart is its fearless emotional depth. While many artists chase trends, Yungllucid chooses **truth over popularity**, giving listeners something to *feel*, not just something to *play*. The album draws influences from modern emo rap and underground hip-hop, but the voice is unmistakably original—his own.

Fans of emotionally honest music from artists like Juice WRLD, XXXTentacion, and Lil Peep will find a new name to add to their playlist.

Lighting Up His Path to Stardom

With no label backing and no industry shortcuts, Yungllucid is a **self made artist with a message that matters**. His mission: to show people it’s okay to feel broken and still dream big. “I want to grow bigger in life and show the world my talents,” he says. And with “**Emotional LIGHTS**”, he’s off to a blazing start.
