Singapore, Singapore Jul 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - Tradelnt™, a verified global trade intelligence platform, has earned top recognition from Crozdesk, Slashdot, G2, and Trustpilot for product excellence and user satisfaction in 2025. These awards reflect the platform's growing influence in helping businesses reduce supply chain risk and make smarter global sourcing decisions.

Tradelnt™, a leading AI-powered trade data intelligence platform, has been honored with multiple recognitions in 2025 from globally respected software review platforms, including Crozdesk, Slashdot, Trustpilot, and G2. These awards reinforce the platform's reputation as a trusted and innovative technology partner for sourcing, procurement, and strategic trade operations.

Recognized by the Industry's Most Trusted B2B Software Platforms

Review platforms like **Crozdesk**, **Slashdot**, **G2**, and **Trustpilot** are known for their rigorous evaluation of software based on real user experiences, performance metrics, and market relevance. According to **G2**, over 90% of B2B buyers rely on third-party peer reviews before making software decisions. Similarly, **Crozdesk's** algorithms and analyst reviews help spotlight only the top 5% of business software based on satisfaction, functionality, and reliability.

In 2025, TradeInt achieved:

- **Crozdesk:**  *High User Satisfaction Badge*
- **Slashdot:**  *Industry Leadership Recognition for Spring 2025*
- **Top Business Software:**  *Top-Rated Business Software in 2025*

"Badges like High Performer or Top Ranked aren't just trophies — they tell the market that this solution delivers measurable value," states a 2024 **G2 Market Trends Report**.

"TradeInt has a lot of information about demographics, contact details, and buying habits. We can use this data to find promising leads, adjust our marketing strategies, and turn prospects into loyal customers. This is the most helpful and positive thing about TradeInt." Wang L., Business Analyst

"Using Trade Intelligence has improved my efficiency by showing me areas where competitors perform well and where they lack, helping me create products that bring immense value to our customers." Ashraff Lukman, Supply Chain Manager

These recognitions signal that TradeInt is no longer an emerging player, but a **category leader** in supply chain and trade intelligence software.

Why Recognition in Software Platforms Matters

According to **Slashdot's 2025 Buyer Insights Report**, 78% of procurement managers are overwhelmed by the volume of tech solutions on the market, and awards or user badges act as validation shortcuts. Trade software buyers want transparency, credibility, and proof of ROI, which makes peer-reviewed recognition crucial in winning trust.

Such reviews are often used in:

- **Vendor shortlisting for enterprise tech adoption**
- **Proof of usability for trade compliance & internal budgeting approval**
- **Benchmarking against industry peers**

These awards mean TradeInt's platform is recognized not only for **innovation** but for **ease of use, tangible impact, and strategic alignment** with today's complex trade environment.

Platform Benefits Backed by User Data

TradeInt is trusted by over 5,000 global users across logistics, manufacturing, commodities trading, and financial consulting sectors. Core features include:

- **Advanced trade record search** by HS code, product name, or company
- **Verified transaction records** from over 200 countries

- **Competitor tracking, sourcing trends, and merchant verification tools**
- **AI-powered data analytics & visualizations for global trade insights**
- **Company profiles and contact database**

TradeInt supports global trade professionals across different functions and industries:

- **Supply Chain Management:** Vet international vendors with shipment consistency, port records, and product volumes
- **Market Intelligence & Strategy:** Identify market entry opportunities, competitor moves, and rising demand pockets
- **Consulting & Advisory:** Deliver high-trust, data-backed recommendations that reduce client risk and increase operational ROI
- **Traders & SMEs:** Leverage the same market intelligence used by Fortune 500 firms, now democratized through smart search

“Receiving these recognitions validates our effort to empower businesses with more than just data — but with clarity and confidence,” said **Ysabelle Yeong**, Product Manager at TradeInt. “We’re honored to be trusted by global users, and this motivates us to keep pushing the limits of what trade intelligence can do.”

About TradeInt™

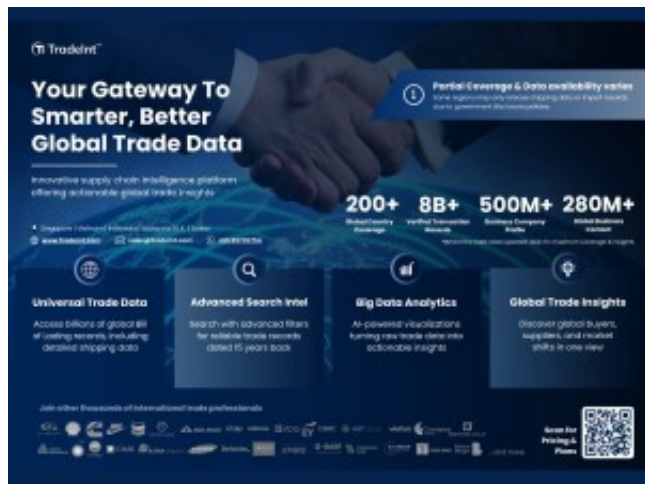

TradeInt™ is a trade data intelligence platform built on verified import and export records from over 80 countries. With AI-powered analytics and the latest trade data updates, TradeInt enables businesses to reduce sourcing risks, validate trade partners, and unlock new global opportunities. The platform supports over 5,000 users worldwide — from strategic sourcing teams to multinational consultancies — who rely on data clarity to drive better decisions.
