

Using cloud computing power to simplify the way to obtain passive income from BTC, XRP and DOGE

Doncaster, England Jul 23, 2025 ([Issuewire.com](https://www.issuewire.com)) - In the first half of 2025, the crypto market rebounded strongly. Mainstream assets such as Ethereum (ETH) achieved higher efficiency after the Dencun upgrade, driving the rapid expansion of DeFi and Layer2 ecology; Ripple (XRP) regained attention in cross-border payment scenarios as the US SEC lawsuit became clearer; Dogecoin (DOGE) also became popular again because Elon Musk mentioned that it would integrate payment functions on the X platform. At the same time, the world's attention to "green mining" and "low threshold participation" continues to heat up.

users in Europe, America, Southeast Asia and other places , facing the reality of local inflation, exchange rate fluctuations, capital flow restrictions and other realities, crypto assets are gradually becoming a new choice for asset allocation and wealth protection. In this context, **OPTO Miner** has launched a mobile cloud computing platform for global users. With a legal and compliant operating structure, intelligent distributed computing power scheduling and green energy-saving technology, users can participate in mainstream crypto asset mining anytime and anywhere with just a mobile phone or computer , and achieve steady growth of digital assets.

Advantages of OPTO Miner

Compared with traditional mining machines that require high hardware investment and complex operation and maintenance thresholds, **OPTO Miner** completely simplifies the process through cloud

deployment. No matter where you are in the world, [you only need a mobile phone or computer to start cloud computing power with one click, view income in real time, and easily participate in the digital asset ecosystem.](#)

OPTO Miner It supports mainstream mineable currencies such as Bitcoin, Ethereum , and Dogecoin , and combines the intelligent scheduling system with green energy nodes to achieve efficient and environmentally friendly computing power allocation. At the same time, **OPTO Miner** provides dozens of mainstream cryptocurrency settlement methods, including **BTC, ETH, BCH, USDT-TRC20, USDT-ERC20, USDC, XRP, SOL, DOGE, LTC** , etc. Users can flexibly choose according to their own asset allocation, which is particularly suitable for cross-border financial management and asset diversification needs.

OPTO Miner uses Cloudflare® and McAfee® security systems to ensure account and data security, supports 24/7 manual technical support, and promises 100% uptime, making the mining experience stable, secure, and uninterrupted.

Green energy drive: The platform's mining facilities give priority to renewable energy such as solar energy and hydropower to achieve clean computing power supply, which is both environmentally friendly and effectively reduces long-term operation and maintenance costs. You can obtain stable passive income by participating in the following green contracts:

[BTC (Miner-S19k-Pro)] Investment amount: \$100, contract period: 2 days, daily income: \$4, expiration income: \$100 + \$8

[BTC (AVALON MINER A1326-109T)] Investment amount: \$500, contract period: 6 days, daily income: \$6.05, expiration income: \$500 + \$36.3

[BTC (iBeLink BM-K1+)] Investment amount: \$1,000, contract period: 10 days, daily income: \$12.5, expiration income: \$1,000 + \$125

[DOGE/LTC (Gold Shell Mini Dog 2)] Investment amount: \$3,000, contract period: 20 days, daily income: \$41.1, expiration income: \$3,000 + \$822

[Antminer S17 Pro] Investment amount: \$5,000 USD, contract period: 26 days, daily income: USD 70, maturity income: USD 5,000 + USD 1,820

[Avalon A1466] Investment amount: USD 10,000, contract period: 37 days, daily income: USD 156, maturity income: USD 10,000 + USD 5,772

After purchasing the contract, the profit will be automatically credited to your account the next day. When the account balance reaches \$100, you can choose to withdraw to your digital currency wallet, or continue to purchase contracts to get more profits.

Simple steps to start cloud mining with OPTO Miner

- Choose **OPTO Miner** as your provider: **OPTO Miner** offers a \$15 free mining plan, where users can earn \$0.60 in passive income per day for free.
- Create an account: Sign up with your email address, log in to the dashboard and start mining immediately.
- Contract selection: A variety of mining options are available to meet different budgets and

investment preferences.

[\(The platform has launched a variety of stable income contract packages, which can be viewed on the official website \[optominer.com\]\(https://optominer.com\)\)](#)

OPTO Miner is not just a mining tool, but also a new way to participate in digital assets. In this era of encryption where the threshold is constantly lowered and the efficiency is constantly improved, it allows ordinary users to connect to the global blockchain network in the most convenient way and achieve stable income.

Whether it is for asset appreciation, global allocation, or early layout of the future of digital finance, **OPTO Miner** provides you with a simple, safe and transparent choice. The next wave of encryption has begun !
