

VNDA Launches as the First Stablecoin Pegged to the Vietnam Dong (VND)

Gold Daude Investment Limited (BVI) has announced the launch of VNDA, a new stablecoin pegged 1:1 to the Vietnam Dong (VND), built on the TRC-20 blockchain network.

Road Town, Tortola Jul 11, 2025 ([Issuewire.com](https://www.issuewire.com)) - Gold Daude Investment Limited (BVI) has announced the launch of [VNDA](#), a new stablecoin pegged 1:1 to the [Vietnam Dong](#) (VND), built on the TRC-20 blockchain network. The initiative forms part of a pilot program aimed at exploring blockchain-based applications within Vietnam's digital economy.

VNDA is designed to offer a stable and accessible medium for digital transactions, supporting both retail and online commerce. Its deployment within the pilot program reflects a commitment to compliance and innovation in the growing fintech space in Southeast Asia.

As part of its rollout, VNDA aims to provide a transparent and efficient payment option for domestic users, while also offering utility in the cross-border remittance market. By maintaining a direct peg to the Vietnam Dong, VNDA can serve as a practical tool for users seeking stability in digital transactions.

To encourage public participation, Gold Daude Investment is currently offering an airdrop campaign to eligible users. Participants can receive VNDA 5,000, with a total pool of VNDA 5,000,000 available until July 31, 2025. Interested users can join the campaign by setting up a TRC-20-compatible digital wallet and following the official VNDA channel on X (formerly Twitter): <https://x.com/VNDACoin>.

VNDA is available for purchase through the platform's official exchange at www.localvnd.com, which offers users a secure and straightforward acquisition process.

Looking ahead, Gold Daude Investment is preparing to launch VNX, a utility token that will operate within the VNDA ecosystem. VNX will be introduced to support governance, staking, and future functionalities within the broader platform.

Gold Daude Investment Limited (BVI) is focused on building compliant, stable, and forward-thinking financial tools to support digital innovation and responsible financial participation across emerging markets.
