

ADO Air One Pro: The Ultimate E-Bike for Every Rider and Every Ride

The ADO Air One Pro combines modular design, BAFANG 2-speed automatic shifting, a torque sensor, belt drive, 100km range, front and rear racks—ideal for commuting, shopping, school runs, and weekend rides.

Amsterdam, Netherlands Aug 15, 2025 ([IssueWire.com](https://www.issuewire.com)) - Building on the success of the ADO Air Series launched in February 2023, ADO presents the Air One Pro—a low-step, 20-inch compact e-bike designed for versatile, **real-life use**. As the final piece of the Air Series, it completes ADO's modular e-bike family, providing reliable electric mobility to every household member.

One Bike, Endless Possibilities

The Air One Pro is designed for everyone—from young commuters to parents, seniors, and casual riders. Its **low-step frame** ensures easy and comfortable mounting, regardless of age, height, or experience. Whether a first-time e-bike user or daily rider, it offers a smooth, intuitive ride for all, with a foldable 90°-rotating handlebar that allows easy storage in compact areas.

Its modular design supports diverse scenarios: attach a **rear rack** to **carry groceries**, fit a **child seat** for school runs, or add front baskets for work essentials. With a 60kg rear rack capacity, wide 20x2.4" tires, and front suspension, the bike is stable, strong, and ready for errands, family outings, leisure, or daily travel.

Smarter Ride, Less Effort

At its core, the Air One Pro features a **BAFANG 2-speed automatic gear hub** that shifts seamlessly by speed and terrain—no manual input needed. It delivers **30% more torque at low speeds** than single-speed motors, ensuring smoother starts and stronger climbs when carrying cargo or a child.

Two assist modes—**Eco** and **Sport**—adapt to flat or hilly terrain. Combined with a maintenance-free **carbon belt** and **torque sensor**, the ride is smooth, quiet, and effortless.

Range, Connectivity, and Safety

The **370Wh seat-tube battery** delivers a range of **80–100km**, with an optional extender providing an additional **40–60km**. Connect via Bluetooth to the **ADO Smart App** for ride stats, battery status, and more.

With **hydraulic disc brakes**, **LED lighting**, and an **upright riding position**, the Air One Pro ensures comfort and control in every condition.

Launching August 25 – Pre-Order Now

The **ADO Air One Pro** will officially launch on **August 25, 2025**, with a recommended retail price of **€1899**.
