

Amid Dogecoin Price Drop, DL Mining Launches Short-Term Contract Platform to Facilitate Stable User Participation

Adelaide , South Australia Aug 4, 2025 ([IssueWire.com](https://www.issuewire.com)) - Recently, the price of Dogecoin (DOGE) has dropped by 30%. Against this backdrop, DL Mining announced the launch of a short-term Dogecoin contract participation platform. This platform aims to provide users with a simplified and predictable way to participate in Dogecoin's market performance, serving as a structured alternative to traditional cryptocurrency investments.

The Debut of Simplified Short-Term DOGE Contracts

The DOGE contracts launched by [DL Mining](#) offer short-term participation opportunities ranging from 2 to 55 days, specifically designed for users who seek predictable daily returns without the need for direct market trading or technical management. Users can easily access these contracts through DL Mining's web platform and mobile application to achieve real-time and secure management and monitoring of their returns.

The DOGE contract platform boasts several prominent features. In terms of contract terms, it offers

flexible options with durations ranging from 2 to 55 days, with daily settlement of returns and a transparent tracking process. The form of return rewards is also highly diverse, allowing users to choose to receive returns in the form of DOGE, BTC, ETH, or USDT to meet the preferences of different users. The platform also leverages artificial intelligence optimization technology, which automatically optimizes contract allocation through algorithm-driven resource scheduling to achieve better performance. For users, there is no need for complex technical setups; all contracts can be managed through DL Mining's mobile application or web platform without requiring any equipment operation or technical expertise. Meanwhile, user funds are secure, with the principal returned upon contract expiration and daily returns credited on time.

Low-Threshold Entry and Lucrative User Benefits

To support wider user adoption of the platform, [DL Mining](#) has prepared an exclusive welcome package for newly registered users. New users can receive

15inreal crypto funds upon registration, and an additional 0.6 by checking in daily. This preferential policy allows users to easily explore the DOGE contract platform and monitor its performance in real-time without investing upfront capital.

Diverse Contract Options to Meet Different Needs

The DL Mining platform supports a variety of DOGE participation contracts to meet the capital scales and return expectations of different users. Among them, the 100 *contract has aduration of 2days, with a daily return of approximately 4 plus a 15 bonus*; the 3,000 contract has a duration of 15 days, with an average daily return of 46.50; and the 10,000 contract has a duration of 37 days, generating a daily return of \$185. Participants can actively track the performance of their contracts through the DL Mining dashboard and directly manage daily withdrawals or reinvestments.

A DL Mining spokesperson stated: "Our Dogecoin contract platform provides a convenient entry point for users seeking stable returns in today's volatile market. With flexible durations and AI-optimized performance, participants can engage in Dogecoin trading without worrying about the challenges of trading or technical setups."

About DL Mining

DL Mining is a UK-based fintech company founded in 2014. Currently, DL Mining has over 5 million users worldwide, offering structured digital asset participation services covering BTC, ETH, DOGE, and XRP. The platform's mission is to democratize cryptocurrency participation through a secure, transparent, and user-friendly contract model.
