

Binsera Corporation Launches ONC-Certified, AI-Powered EHR Platform with Built-In PACS and Offline Capability

Binsera's cloud-native, fully AI-driven platform serves large hospital networks, long-term care facilities, dentists, physical therapists, multi-specialty hospitals, and independent practices — delivering every workflow in one secure ecosystem.

**ONC Certified AI-Powered EHR
with Built-In PACS & Offline Care**

Houston, Texas Aug 27, 2025 ([IssueWire.com](https://www.issuewire.com)) - Binsera Corporation Launches ONC-Certified, AI-Powered Cloud EHR Platform with Built-In PACS and Offline Capability

Binsera Corporation, a multinational healthcare technology company with offices in the U.S., Canada, and the U.K., today announced the official launch of its ONC-certified, HIPAA-compliant Electronic Health Record (EHR) platform. This next-generation solution integrates AI-powered billing and claims automation, PACS imaging, and full offline functionality, making it one of the most comprehensive systems available to hospitals, nursing homes, and specialty practices.

Over four years in development with more than \$5.7 million invested in R&D, the Binsera platform was designed to meet the complex needs of modern healthcare facilities. It unifies critical modules including radiology, pharmacy, lab, and blood bank systems — all within a multi-tenant, cloud-ready architecture.

“Healthcare facilities need more than just record-keeping software — they need intelligent, reliable, and offline-capable tools,” said Narendran Kizhakkekalappurackel Sankaran, Founder & CEO of Binsera Corporation. “Our platform brings AI-driven insights and cloud-based technology into everyday patient care, making it faster, safer, and more efficient.

” Key Features:

ONC-Certified & HIPAA-Compliant: Fully compliant for U.S. healthcare providers.

AI-Powered Billing & Claims: Automates coding, eligibility checks, and claim submissions. Built-In PACS Integration: Upload, store, and view DICOM studies directly within the EHR.

Offline Ready: Continue patient care even without internet connectivity.

Multi-Facility Support: One system for hospitals, clinics, nursing homes, and specialty centers.

Binsera is now offering **pilot programs to hospitals and long-term care facilities across North America and the U.K.**, allowing administrators and clinicians to evaluate the platform’s unique advantages over existing systems.

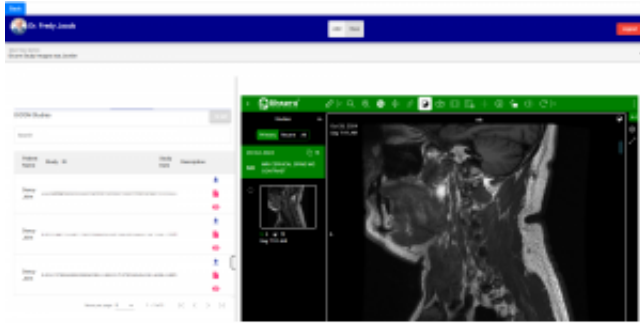

About Binsera Corporation

Binsera Corporation is a healthcare technology company committed to transforming patient care with AI-powered, cloud-ready, and offline-capable solutions. Headquartered in the United States with offices in Canada and the U.K., Binsera builds innovative platforms that unify EHR, PACS, telemedicine, and advanced billing workflows under one seamless system.
