

Deladap Brings Pure Electronic Bliss with New Single 'Shiver'

Bringing the genre of Swing to a different new level, Deladap releases an enchanting new song, 'Shiver'. The fun and vibrant composition brings life and happiness.

Lower Austria, Aug 11, 2025 ([Issuewire.com](https://www.issuewire.com)) - Music has always been connecting rhythm with emotions and feelings. The latest example of this simple yet powerful act is '[Shiver](#)', the new single by ever-talented artist **Deladap**. The track is bold, catchy, full of flair, and brings together rhythm and emotion like never before. The artist knows how to build a song that sticks, and this song is the perfect reflection of that. Filled with such a vibe and the artist's signature electro swing style, the song

will stay in the minds of the listeners for a long time. The song is now available on Spotify, and it is already making quite a wave in the industry.

Sharp electronic beats are blended with warm elements, crafting the most suitable production for **'Shiver'**. The center of the song, however, is filled with the mesmerizing energy of Melinda Stokia, the featured artist on the track. The guitar riffs on the production add a new kind of texture to the tracks that take the composition to a whole new level. Stanislav Vana has done an impeccable job on the composition of the song. However, the lyrics and vocals also played their roles beautifully to make such a fun and vibrant song. **Deladap** has definitely brought his A-game to this song, making this one of the most memorable ones in his discography. Listen to the song on [Spotify](#) and [SoundCloud](#), along with some of his previous releases: **'Dirty Jazz'**, **'Georgian Lessons 1-6'**, **'Crazy Swing'**, **'Make Swing Great Again'**, etc. For more updates, follow the artist on [YouTube](#) and [Facebook](#).

Let's listen to Deladap's new track "Shiver" only on Spotify:
