Dev Technosys Introduces AI-Powered Real Estate App Development for Smarter Property Deals

Dev Technosys revolutionizes real estate app development with AI-driven features, enabling faster, smarter, and more secure property transactions.

Commerce, California Oct 13, 2025 (Issuewire.com**)** - Dev Technosys, a leading global provider of mobile and web solutions, has announced the launch of its **AI-powered real estate app development** services, designed to transform property buying, selling, and renting experiences. This new offering leverages artificial intelligence, virtual tours, and predictive analytics to make property transactions faster, smarter, and more secure.

With the rapid digital transformation in the real estate industry, Dev Technosys is addressing the demand for mobile-first solutions that simplify the property search process for buyers, sellers, and realtors.

Smarter Property Deals with AI

"AI technology is opening new doors for real estate innovation," said *Tarun Nagar*, CEO of Dev Technosys. "Our latest solutions combine AI-based property recommendations, AR/VR virtual tours, and secure transaction tools to help clients close deals faster and with more confidence."

The company's real estate app development services include:

- **AI-Powered Property Matching** – Suggests the most relevant listings based on user preferences.

- **Virtual Tours with AR/VR** – Enables remote property viewing without physical visits.

- **Integrated CRM Systems** – Helps agents track leads, manage contacts, and close sales efficiently.

- **Secure Digital Documentation** – Ensures safe e-signature and contract handling.

- **Multi-Language and Multi-Currency Support** – Expands reach to a global audience.

Real Estate App Development Cost – Transparency First

One of the most common questions from property agencies and startups is, "What **is the real estate app development cost?"** Dev Technosys ensures transparency by offering customized pricing based on project scope, features, and complexity.

Estimated cost breakdown:

- **Basic Real Estate App** – $15,000 to $20,000 (property listings, search, and basic filters).

- **Mid-Level Solution** – $25,000 to $40,000 (CRM tools, chat, map integration, scheduling).

- **Advanced AI-Powered App** – $50,000+ (predictive analytics, AR/VR tours, blockchain security).

The company also offers flexible payment models and detailed cost estimations before development begins, allowing clients to plan budgets effectively.

Why Choose Dev Technosys?

With over 15 years of experience, a team of 150+ skilled professionals, and 1,500+ successful projects delivered across 80+ countries, Dev Technosys has become a trusted partner for innovative mobile solutions.

Key strengths include:

- **End-to-End Development** – From concept to launch and ongoing maintenance.

- **Cutting-Edge Technologies** – AI, blockchain, cloud, and IoT integrations.

- **Scalable Solutions** – Designed to handle large databases and growing user traffic.

- **Security-First Approach** – Compliance with GDPR and industry standards.
